1 BEFORE THE COURT

2 THE COURT: Mr. O'Connell.

3 MR. O'CONNELL: Thank you, your Honor.

4 Plaintiffs are calling Frances Gaffney, please.

5 FRANCES GAFFNEY

6 having been duly sworn, testified as follows:

7 THE CLERK: Will you please state your name
8 for the record and spell your last name.

9 THE WITNESS: My name is Frances Gaffney,.
10 G A F F N E Y, Comeau, C O M E A U.

11 DIRECT EXAMINATION

12 BY MR. O'CONNELL:

13 Q. Where do you live?

14 A. I live in Lee, New Hampshire.

15 Q. Are you currently employed?

16 A. I am.

17 Q. Where are you employed?

18 A. I'm employed at Exeter Healthcare.

19 Q. And what is Exeter Healthcare?

20 A. Exeter Healthcare is a 28-bed skilled facility
21 that's located on the campus of Exeter Hospital.

22 Q. What is your position at Exeter Healthcare?

23 A. I'm the administrator at Exeter Healthcare.

24 Q. And what types of services are provided at
25 Exeter Healthcare?

1 A. Exeter Healthcare has four basic types of
2 services they provide. We provide short-term rehab to
3 patients who are leaving the hospital and aren't quite
4 ready to go home either as a result of a surgery or a
5 medical event like a stroke. We provide treatment for
6 medically complicated patients, those patients who may
7 need to have six weeks of antibiotics that they can't
8 take by mouth at home and have to be administered
9 intravenously. We have two dedicated rooms for hospice
10 patients so that patients who aren't able to die at home
11 with their family around them can come to Exeter
12 Healthcare and have their family there as opposed to
13 being in the hospital or at a facility further away.
14 And then we have a program for management of patients on
15 ventilators, whether they're on them long-term
16 permanently or short-term as a result of some acute
17 illness.

18 Q. What is the current status of Exeter
19 Healthcare?

20 A. On September 14th, 2011, an announcement was
21 made that Exeter Healthcare would be closing no later
22 than September 30th of 2012.

23 Q. You indicated that Exeter Healthcare has
24 long-term and short-term patients?

25 A. We do.

1 Q. What is the Medicaid status of the long-term
2 patients?

3 A. The long-term patients that are on ventilators
4 we receive inclusive reimbursement of \$585 a day. The
5 patients who are not on ventilators but required
6 long-term --

7 Q. I asked you a different question. I'm sorry
8 if I confused you. But of the long-term patients how
9 many are Medicaid enrolled?

10 A. We currently have a census of 11 Medicaid
11 patients, one patient that we recently admitted over the
12 last week who's Medicaid pending who had been in the
13 hospital for 77 days and couldn't be accepted by a
14 facility, so in total it's 12.

15 Q. How many of the 12 are ventilator dependent?

16 A. Nine.

17 Q. And when you say long-term, what is the range
18 of time that those patients have been resident at Exeter
19 Healthcare?

20 A. Anywhere from one year to ten years.

21 Q. What is the reason that Exeter Healthcare is
22 being closed?

23 A. Exeter Healthcare runs a deficit margin. We
24 lose approximately \$3 million every year that we're in
25 operation.

1 Q. And what is the current status of those
2 long-term residents at Exeter Healthcare?

3 A. All of those residents are currently staying
4 at Exeter Healthcare until facilities are approved by
5 the State of New Hampshire to provide ventilator
6 management or managing long-term complicated Medicaid
7 patients. So the state is currently trying to identify
8 those providers, and then I guess they'll have to try to
9 negotiate a rate. But until that's completed they
10 continue to stay with us.

11 Q. Are you aware of any other programs in the
12 state of New Hampshire that provide the same type of
13 ventilator support for patients as has been the case at
14 Exeter Healthcare?

15 A. There's one other facility that I'm aware of
16 that has one ventilator dependent patient. However, the
17 program differs substantially from the program at Exeter
18 Healthcare.

19 Q. Is there a reason why there are not more
20 providers that provide ventilator services on a
21 long-term basis like Exeter Healthcare?

22 A. Yes. There used to be a number of them in the
23 state of New Hampshire but they're very intensive in
24 terms of time, staff expertise, and cost. And we were
25 the only -- our program started in 1994 and we are the

1 only program that has consistently provided care over
2 that course of time. All the other programs have ceased
3 to operate.

4 Q. From where do you draw patients for the 28
5 beds that you have at Exeter Healthcare?

6 A. Primarily from the state of New Hampshire. At
7 times we have referrals from the state of Vermont and
8 Vermont Medicaid would pay us for that care. Southern
9 Maine because of our proximity to the Maine border.

10 Q. But you do a statewide draw here in New
11 Hampshire?

12 A. We do.

13 Q. And you -- are you -- strike that. What is
14 Exeter Healthcare's association with what you referenced
15 as Exeter Hospital?

16 A. Exeter Hospital is another organization under
17 the Exeter Health Resource Company, we're a healthcare
18 system, and we're located on the campus across the
19 street from the hospital.

20 Q. Are there other affiliates of the hospital in
21 addition to Exeter Healthcare?

22 A. Yes, there are. There's Rockingham VNA
23 Hospice, Core Physician Services, Exeter Hospital,
24 Exeter Healthcare and Synergy Health and Fitness.

25 Q. And Core is what?

1 A. Core is a physician organization. We employ
2 125 physicians that serve our primary market, our
3 primary service area.

4 Q. And together those entities that you just
5 described are under what organization?

6 A. Exeter Health Resources.

7 Q. What is the status of your employment upon the
8 closure of Exeter Health Resources?

9 A. I will not be employed. Once Exeter
10 Healthcare ceases to operate I will no longer have a
11 job.

12 Q. Are you familiar with the Medicaid
13 reimbursement reductions that occurred in the state from
14 fiscal year 2011 and 2012?

15 A. I am.

16 Q. Can you identify for the Court what the
17 year-over-year reduction was in payments that Exeter
18 received in 2011 to 2012? And let me put that in front
19 of you, Ms. Gaffney. I'm putting in front of you
20 Exhibit 64. There is a blowup to your left.

21 A. Um-hum.

22 Q. If you look at the total UCC payments, the
23 Court has already heard orientation about this chart,
24 but what is the number for Exeter Hospital total UCC
25 payments last year?

1 A. \$9,889,671.

2 Q. And payments in fiscal year 2012 are what?

3 A. Eleven million --

4 Q. Total UCC payments.

5 A. Oh, zero. Sorry.

6 Q. And the amounts of money that Exeter is hoping
7 to save as a result of the closure of Exeter Healthcare
8 is approximately what?

9 A. \$3 million.

10 Q. Are you involved in the efforts to try and
11 transfer the long-term patients to new facilities?

12 A. I am. As the licensed administrator at Exeter
13 Healthcare, the responsibility is ultimately mine.

14 Q. And for what period of time have you been
15 involved in trying to find a replacement facility for
16 the long-term Medicaid patients at Exeter Health
17 Resources?

18 A. We met with representatives from the state
19 prior to the announcement on September 14th, so probably
20 right after Labor Day we started conversations.

21 Q. So approximately August or September?

22 A. Yes.

23 Q. And to date have any resources in state been
24 identified for the placement of your long-term
25 ventilator dependent patients?

1 A. No, they have not.

2 Q. If no program can be found in the state of New
3 Hampshire for these ventilator patients, what are their
4 options?

5 A. Well, since the announcement of Exeter
6 Healthcare being closed has been made and under Medicare
7 law we're required to give a 60-day notice, so my
8 understanding is that that date is firm. So in the
9 event that we would close and there would be no
10 facility, patients would either have to be placed out of
11 state in, say, Massachusetts or New Jersey where there
12 are facilities or be transferred to hospitals where
13 patients of this type are managed in an intensive care
14 unit because typically you won't find on a regular
15 hospital floor a patient on a ventilator because it is a
16 complicated service.

17 Q. So in what way would the care change with
18 these ventilator patients from, say, Exeter Health
19 Resources to an ICU or some type of intensive care unit
20 in a hospital?

21 A. The focus of an acute care hospital is you go
22 in when you're sick and then you want to leave. The
23 longer you stay there's data that shows the more chance
24 you have to get additional illnesses, whether it's
25 problems with your skin -- ventilator patients are at

1 high risk for developing pneumonia. So they have their
2 place, but for people who are living, dependent on a
3 ventilator, it's important for them to have daily
4 activities that are rehabilitative in nature, social, so
5 that they can get up and participate in their daily
6 routines, which isn't allowed in an acute care hospital
7 in an ICU. At Exeter Healthcare if somebody has a dog,
8 many of our patients have family dogs, children, they
9 come in and they visit, dogs get on the bed. They do
10 what they would do at home. That could never be allowed
11 in a hospital environment.

12 Q. Have you had occasion to try and place any of
13 your long-term patients in other facilities in the state
14 of New Hampshire?

15 A. A couple years ago one of our patients who had
16 originally been on a ventilator and we weaned off the
17 ventilator was transferred to Exeter Hospital for an
18 acute illness, and while he was there the family had
19 requested he be placed closer to them because they live
20 in the western part of the state out by Peterborough,
21 and during the two months that that man was in the
22 hospital he was referred to 59 facilities that would
23 have been closer for the family to go visit and none of
24 them would accept him. Actually, one did accept him.
25 He went there for one day and his daughter called us

1 saying that he was traumatized, he needed to come back,
2 and so we readmitted him knowing that the burden was on
3 the family to try to continue to visit from that far
4 distance.

5 Q. Is the patient you just referenced still a
6 resident of Exeter Healthcare?

7 A. He is.

8 Q. Have you been able to successfully find a
9 placement for him now given that it's going to be
10 closing?

11 A. No, we have not.

12 Q. Can you describe for the Court the economics
13 associated for caring for a ventilator dependent
14 patient. For example, what are the costs that Exeter
15 Healthcare incurs for daily care?

16 A. On average the cost, not the charges, are a
17 thousand dollars a day. We get reimbursed \$585 a day.

18 Q. So there's a \$415 difference on a daily basis
19 for these patients?

20 A. Per patient per day, correct.

21 Q. How is that difference, that \$415 difference
22 per patient per day currently covered at Exeter?

23 A. The Exeter Health Resource board has
24 year-over-year when they've reviewed budgets decided
25 that the loss of Exeter Healthcare could be offset

1 within the organization from other parts of the
2 organization that had a positive bottom line. So we
3 basically have been subsidized by Exeter Hospital.

4 Q. Did the trustees make a different decision
5 given the \$9.8 million change in funding for the State
6 of New Hampshire for this fiscal year?

7 A. They did.

8 Q. Ms. Gaffney, you were in court this morning
9 when we were talking about other category changes for
10 inpatient, outpatient and those types of reimbursements
11 generally?

12 A. I was.

13 Q. Has Exeter gone through a similar exercise as
14 you heard testified to about Lakes to determine what its
15 financial impacts have been by changes in other
16 categories?

17 A. Yes.

18 Q. I ask you to look at Exhibit 72 for ID. Do
19 you recognize that document?

20 A. I do.

21 Q. Without asking you to go through all of the
22 categories as we did earlier today with another witness,
23 can you simply verify that this is what the institution
24 believes the financial impact has been for the rate
25 reductions referenced on this page?

1 A. Yes.

2 MR. O'CONNELL: I'd offer it at this time,
3 your Honor.

4 THE COURT: Any objection?

5 MR. O'CONNELL: I'd offer this exhibit, Ms.
6 Smith.

7 MS. HERRICK: We have no objection.

8 THE COURT: ID may be stricken on Plaintiffs'
9 72.

10 (Plaintiffs' Exhibit 72 admitted.)

11 Q. And just before we put this away, the total
12 financial impact that Exeter is dealing with for the
13 period 2008 through 2013 is what number?

14 A. \$16,089,710.

15 Q. And that includes the upper pay limit
16 reduction, does it not?

17 A. Yes.

18 Q. If we take that number out, what is the total
19 above that?

20 A. 13,065,466.

21 Q. And that's different than -- or independent I
22 wish to say than the \$9.8 million that we talked about
23 earlier in the year-over-year change, is it not?

24 A. Yes, it is.

25 Q. In addition to the closure of this ventilator

1 dependent program and the program for the medically
2 complex patients you described, what other changes has
3 Exeter Health Resources, the parent organization,
4 implemented to deal with the financial circumstances we
5 have been discussing?

6 A. Over the past -- well, in September about 70
7 individuals were laid off. There were 40 positions that
8 were open that were decided not to fill. There was an
9 adult dental practice that closed. There was a program
10 in place for directors, managers, vice-presidents,
11 executive personnel where goals were set, and then there
12 was discretionary bonus money that was paid at the end
13 of the year. This year, although the money was budgeted
14 to be paid, no dollars were paid out to employees and
15 that equaled about \$1.2 million.

16 Also the health insurance. The contribution
17 that the employees have to put in for their health
18 insurance has increased and the benefits have changed in
19 that there are higher deductibles for the employees when
20 they need services.

21 Q. Has Core Physicians, the physician practice
22 part of Exeter Health Resources, implemented any
23 changes?

24 A. They had some staff reductions as well as
25 recently making a decision that Medicaid recipients who

1 live beyond their service area will not be accepted as
2 new patients into a Core Physician practice.

3 Q. What is the Exeter primary service area?

4 A. It's primarily the seacoast, but it goes as
5 far west as Nottingham down towards Plaistow down the
6 125 corridor. So although it's primarily seacoast, we
7 do catch a number of surrounding towns.

8 Q. So for example, if some Medicaid patient from
9 the Lakes Region General Hospital primary service care
10 area tried to be treated by a primary care physician in
11 Exeter, would they be accepted or would they not be
12 accepted?

13 A. They would not be accepted after February 1st
14 of this year.

15 Q. Can you tell me with regard to the reductions
16 in UPL and DSH payments this year, was any inquiry made
17 from the Department of Health and Human Services to
18 Exeter or Exeter Healthcare as to what impacts those
19 reductions could have on your ventilator dependent
20 program?

21 A. No, there were not.

22 Q. Were you aware of any opportunity to provide
23 public comment on a proposed state plan amendment that
24 was geared to deal with the reductions in the payments
25 referenced in Exhibit 63?

1 A. No, I am not.

2 Q. Ms. Gaffney, why is Exeter taking the actions
3 that you've described here this afternoon?

4 A. Because Exeter is facing a substantial
5 decrease in funds available to support programs to the
6 tune of \$10 million to date and Exeter Healthcare,
7 having been subsidized for \$3 million every year, they
8 just feel that they can't afford to continue to do that
9 and make the organization, the health system viable for
10 the years to come.

11 Q. Do you believe that within the state of New
12 Hampshire there exists the capacity to take your
13 long-term ventilator dependent patients from Exeter
14 Healthcare into another program?

15 A. As of today, no, I do not.

16 MR. O'CONNELL: One second, your Honor. I
17 pass the witness. Thank you, Ms. Gaffney.

18 THE COURT: Attorney Smith? I'm sorry,
19 Attorney Herrick. Sorry.

20 CROSS-EXAMINATION

21 BY MS. HERRICK:

22 Q. You've said in your testimony that you have
23 eight ventilator units; is that right?

24 A. We have nine patients that are reimbursed as
25 ventilator dependent patients.

1 Q. And you said that your reimbursement rate is
2 \$400 short of what it costs you to provide those
3 services?

4 A. \$415 per patient per day.

5 Q. And when you use the word "costs" what are you
6 referring to?

7 A. The actual cost of services that are provided.

8 Q. By my calculation 8 or 9 times 400 times
9 365 days a year would result in about a million-dollar
10 loss; is that right?

11 A. I haven't done the math.

12 Q. If I'm correct, you have a \$2 million loss or
13 so from the other beds in your facility; right?

14 A. If your math is correct.

15 Q. And those beds are not necessarily Medicaid
16 beds, are they?

17 A. They are all licensed and certified under the
18 Medicaid program.

19 Q. Many of those patients though are Medicare
20 eligible patients; right?

21 A. Yes.

22 Q. And the payment rate for Medicare for your
23 facility changed on October 1st of 2011, didn't it?

24 A. Correct, it did.

25 Q. It was reduced about 12 percent or so?

1 A. The actual reduction to Exeter Healthcare
2 overall was about \$25 per patient per day.

3 Q. Did you tell anyone from the state that the
4 closing of Exeter Healthcare facility was due to the
5 reduction from Medicare?

6 A. Not that I recall.

7 Q. Who were you working with at the state in
8 order to place those patients?

9 A. I spoke last week with Karen Carlton. There's
10 a man by the name of John Martin who's currently in the
11 role that Bob Allers had fulfilled until he left, and
12 Jonathan McCosh.

13 Q. Exeter Healthcare doesn't provide any general
14 hospital services, does it?

15 A. Could you define what you mean by general
16 hospital services?

17 Q. The ones that would be subject to the
18 inpatient and outpatient rates that are being discussed
19 in this trial.

20 A. No.

21 Q. The ventilator patients in particular are
22 paying under an atypical nursing home rate; right?

23 A. Correct.

24 Q. And none of the reductions that you discussed
25 with Attorney O'Connell had anything to do with the

1 atypical nursing home rate for ventilator patients, did
2 it?

3 A. Correct. Not directly.

4 Q. How would the rate paid for the atypical
5 nursing home be indirectly?

6 A. Well, because by the state imposing the MET
7 tax the Exeter Hospital is no longer able to subsidize
8 us and the ventilator rate has not been adjusted since
9 -- it's over three years since that rate has been
10 evaluated and we haven't received any change in
11 reimbursement for care for those patients.

12 Q. So it's the Medicaid Enhancement Tax that is
13 really your issue?

14 A. It's the issue for the entire organization
15 trying to figure out which services we can continue to
16 try to support that don't have adequate reimbursement
17 for the services we provide.

18 Q. Now, Attorney O'Connell showed you information
19 about the losses that the Exeter Healthcare system, the
20 regional healthcare, I forget --

21 A. Exeter Health Resources.

22 Q. Exeter Health Resources. Those numbers are
23 for Exeter Health Resources; right?

24 A. Which numbers?

25 Q. The ones that he showed you on -- I believe

1 it's still up, Exhibit 72. It's on the screen in front
2 of you. It should be.

3 A. Um-hum.

4 Q. Just based on the face of the chart it appears
5 that those are Exeter Health Resources. They are not
6 Exeter Healthcare numbers, are they?

7 A. No, they are not. I believe these are all
8 Exeter Hospital's numbers.

9 Q. But you don't know for sure, do you?

10 A. All the services listed are found in an acute
11 care hospital.

12 Q. You didn't prepare that exhibit?

13 A. I've reviewed this exhibit with our financial
14 officer and the attorney.

15 Q. And when you made the decision to close Exeter
16 Healthcare, you anticipated that it would take up to
17 12 months to place the residents there, didn't you?

18 A. That's what we allowed. We are required under
19 law to give a 60-day notice.

20 Q. Have you spoken to anyone at the state about
21 transitioning some of the patients to Genesis
22 Healthcare?

23 A. No, I have not.

24 Q. So you're not aware of a plan that would allow
25 them to be transferred to Genesis?

1 A. I know Genesis expressed interest, but the
2 state has not revealed to me who the approved providers
3 will be.

4 Q. Has the state discussed with you potential
5 placement at Crotched Mountain?

6 A. I know that Crotched Mountain, too, has
7 expressed interest, but I don't know that that's where
8 the state is going to approve any of these patients to
9 be transferred to.

10 Q. It certainly is possible for the state to have
11 that in place before September of 2012, isn't it?

12 A. It's possible.

13 Q. Do you know who Mark Whitney is?

14 A. I do.

15 Q. Who is he?

16 A. He's the vice-president of strategic planning
17 at Exeter.

18 Q. And he often speaks on behalf of Exeter?

19 A. He does.

20 Q. Are you aware that Mr. Whitney said that the
21 cutback decisions were driven by two things, first the
22 change in the Anthem rates, and secondly the change of
23 the MET tax?

24 A. I'm not familiar with the quote.

25 MS. HERRICK: May I approach, your Honor?

1 THE COURT: Anytime, feel free.

2 MR. O'CONNELL: What document are you showing
3 the witness, please?

4 MS. HERRICK: This is a press release issued
5 on September 15th, 2011.

6 MR. O'CONNELL: May I review it?
7 (Pause.)

8 A. I've read the highlighted part.

9 Q. Do you have any reason to doubt that that's a
10 press release issued by Exeter Healthcare?

11 A. Exeter Health Resources.

12 Q. Exeter Health Resources?

13 A. No, I have no reason to doubt it.

14 Q. And is it -- on the backside of the page, can
15 you read to me what Mr. Whitney said about the reasons
16 for the cutbacks?

17 A. The entire quote or the part you have
18 highlighted?

19 Q. The part I have highlighted, please.

20 A. Okay. Facing as a result of new Anthem
21 contract terms with Exeter Hospital and Core Physicians,
22 along with the state's imposition of ten million in net
23 Medicaid taxes on Exeter Hospital this year.

24 MS. HERRICK: I have nothing further.

25 THE COURT: Any redirect?

1 MR. O'CONNELL: Very briefly, your Honor.

2 REDIRECT EXAMINATION

3 BY MR. O'CONNELL:

4 Q. Ms. Gaffney, with regard to the press release
5 you were just shown, there's a reference to the
6 administration of the MET on a net basis. For 2012,
7 Exhibit 64 suggests that Exeter is going to be paying a
8 Medicaid Enhancement Tax of what amount of money?

9 A. \$11,173,113.

10 Q. And there would be no UPL or DSH payments made
11 underneath this budget; correct?

12 A. Correct.

13 THE COURT: Anything else?

14 MR. O'CONNELL: No, your Honor.

15 THE COURT: Thank you, ma'am, you may step
16 down. You're excused. You may call your next witness.

17 MR. O'CONNELL: Yes. Dr. Philip Sullivan,
18 please.

19 PHILIP W. SULLIVAN, MD

20 having been duly sworn, testified as follows:

21 THE CLERK: Please state your name and spell
22 your last name for the record.

23 THE WITNESS: Philip with one L, middle
24 initial W, last name Sullivan, S U L L I V A N.

25 DIRECT EXAMINATION

1 BY MR. O'CONNELL:

2 Q. Good afternoon, Dr. Sullivan.

3 A. Good afternoon, Mr. O'Connell.

4 Q. Where do you live, sir?

5 A. I live in Amherst, New Hampshire.

6 Q. Where are you currently employed?

7 A. I'm employed at Southern New Hampshire Medical
8 Center in Nashua, New Hampshire.

9 Q. What is your profession?

10 A. I am a psychiatrist, an M.D., a medical doctor
11 with advanced training in treating psychiatric illness.

12 Q. And for what period of time have you been a
13 psychiatrist?

14 A. I finished my residency in 1987, so about
15 25 years.

16 Q. What is your current role with Southern New
17 Hampshire Medical Center?

18 A. I serve as the medical director for our
19 inpatient behavioral health unit and oversee clinical
20 care within the behavioral health department for our
21 partial psychiatric day program, for our emergency room,
22 and oversee the other physicians who work within the
23 department.

24 Q. What is the behavioral health unit as part of
25 Southern New Hampshire Medical Center?

1 A. It's an acute care psychiatric unit where we
2 evaluate, treat, and undergo discharge planning for
3 seriously psychiatrically ill patients, generally
4 patients who are unable to function at home because of
5 their illness or are unsafe in some way, a danger to
6 themselves or to others because of their illness and
7 cannot function except in a structured inpatient
8 hospital environment.

9 Q. Starting in 2008, how large -- this is the
10 number of bed count -- was the behavioral health unit?

11 A. At that time we were a 30-bed unit.

12 Q. And what is it currently?

13 A. Ten beds.

14 Q. And are there any current plans for further
15 reduction?

16 A. That is still on the table. When the Medicaid
17 reductions came down in the summer of 2011 the initial
18 plan was to completely close the unit as quickly as
19 possible. We reduced to ten beds in anticipation of
20 closing. At this point we're in a holding pattern
21 waiting to see whether that's a viable option.

22 Q. What were the reasons that caused Southern New
23 Hampshire to reduce the size of the program?

24 A. Because of the sizable deficit that we
25 experienced because of the reduction in Medicaid

1 payments.

2 Q. I'd like you to look at what we've been
3 referring to today as Exhibit 63. Would you indicate
4 for the Court the amount of total UCC payments that
5 Southern New Hampshire received in state fiscal year
6 2011?

7 A. That's \$11,896,946.

8 Q. And what payments were they to receive, total
9 UCC payments, in 2012?

10 A. That's zero.

11 Q. Was the behavioral health unit operating with
12 a positive margin or a negative margin at the time it
13 was reduced?

14 A. This is not unique to our behavioral health
15 unit. Generally all behavioral health units run at a
16 substantial deficit.

17 Q. How were the deficits covered before the
18 decision was made to reduce the size that it currently
19 operates under?

20 A. Because the hospital was able to maintain a
21 positive margin, they subsidized our services.

22 Q. And what happened this year that caused a
23 change in that willingness to do the subsidy?

24 A. The substantial deficit that put the hospital
25 into a negative margin.

1 Q. Now, what size -- strike that. What percent
2 census or percent of the population that would
3 historically be admitted to the BHU were Medicaid
4 patients?

5 A. Medicaid patients and potentially eligible
6 patients eligible for Medicaid range between 35 and
7 40 percent.

8 Q. Would you describe that last phrase you used,
9 potentially eligible for Medicaid? What does that mean?

10 A. Well, it means at the time they have no
11 insurance at all, and usually by virtue of their mental
12 illness they are poor and have no resources. People who
13 are chronically mentally ill are generally eligible for
14 Medicaid if they are helped with the application
15 process. Generally chronically mentally ill people have
16 functional impairments which make it difficult for them
17 to apply for Medicaid on their own and many of them fall
18 through the cracks.

19 Q. So if someone presented without insurance at
20 Southern New Hampshire for admittance into the BHU,
21 would you take certain action with regard to Medicaid
22 status?

23 A. Whenever we admit an uninsured patient who's
24 chronically mentally ill, we help them with the process
25 of applying for Medicaid during their hospitalization.

1 Q. Have you, sir, as the director of this program
2 tried to calculate the number of Medicaid patients on an
3 annual basis who will not have access to the BHU now
4 that it's ten beds as opposed to 30 beds?

5 A. Yes, I have.

6 Q. What is that number, sir?

7 A. 237 patients per year.

8 Q. And how is that number calculated?

9 A. We took the number of admits to the hospital,
10 to the psychiatric unit, multiplied it by the percentage
11 of Medicaid and potentially Medicaid eligible patients
12 for each year, and then subtracted the number for 2012
13 from the number for 2009.

14 Q. So if one of these 237 potential patients to
15 the BHU presents at Southern New Hampshire, how will
16 they be treated?

17 A. Well, they will not all be receiving care
18 under our psychiatric inpatient unit. They will be
19 evaluated in the emergency room, which is a short
20 process which does not involve any treatment and
21 referred either to another hospital, which is difficult
22 because other hospitals are experiencing exactly the
23 same situation and often refuse our patients when we try
24 to refer them, or refer them to outpatient services,
25 which are inadequate to the task of treating a seriously

1 mentally ill individual in a decompensated state, which
2 they are when they come to the emergency room.

3 Q. The typical Medicaid patient who was formerly
4 treated at the BHU would get comparable care from an
5 emergency department?

6 A. Absolutely not.

7 Q. In what ways would it be different?

8 A. Emergency room care is just that. It's
9 emergency based. It's usually over a period of several
10 hours. It involves acute stabilization to the point
11 where the patient is safe enough to exit the emergency
12 room. No real care or treatment is provided beyond
13 safety considerations.

14 Q. With regard to the BHU, what type of care or
15 treatment would you provide that is different than what
16 you just described would happen in an emergency
17 department?

18 A. Comprehensive care that would include direct
19 one-on-one nursing care, management by nurses of the
20 patient's illness, full psychiatric evaluation, daily
21 meetings with the psychiatrist to provide treatment, and
22 as our process evolves over the course of the stay on
23 the unit, we involve family members through meetings
24 with social workers and psychiatric staff and do
25 comprehensive discharge planning so that the treatment

1 that is put in place during the inpatient stay can be
2 continued on an outpatient basis.

3 Q. Are there particular challenges in treating
4 those with mental illness?

5 A. The challenges are many. Treating someone
6 with a serious mental illness is quite different from
7 treating someone with a medical illness.

8 Q. In what way?

9 A. Well, if you're medically ill you generally
10 want to come to the hospital. You know you have
11 something wrong with you and you are actively engaged in
12 seeking care and accepting the recommendations that are
13 given to you.

14 Just the opposite is true of mentally ill
15 patients. They often don't believe they have an
16 illness. They may be psychotic and think that the
17 voices are controlling them or that the FBI is out to
18 get them, paranoid delusions, that sort of thing. So
19 there's a lot of finesse involved in engaging the
20 patient in the treatment process. Initially many
21 patients don't accept treatment and we have to convince
22 them that they are ill, hold their hand, teach them
23 about their illness, teach them about the treatment that
24 is going to help them, and then initiate that treatment.
25 And that all takes considerable time.

1 Q. Have you experienced any difficulties at
2 Southern New Hampshire with mentally ill patients
3 attempting to receive care in the emergency department?

4 A. Yes, we have, and the difficulties in the
5 emergency room have steadily escalated over the last two
6 or three years. We have seen increasing -- because of
7 inadequate treatment in patients feeling frustrated by
8 not getting adequate treatment in the emergency room or
9 exiting the emergency room only to return later that day
10 or in the days that follow, we see them becoming
11 increasingly agitated. We've had a remarkable increase
12 in violence in our emergency room over the last three
13 years. In fact, just two weekends ago police had to be
14 called to the emergency room, not an uncommon occurrence
15 these days, and when they attempted to subdue an
16 agitated patient they had to use a taser. The taser hit
17 the wrong individual. One of our security guards was
18 tasered in the process of police intervening in our ED.

19 Q. At the time the behavioral health unit was
20 reduced from 30 beds down to ten, what other resources
21 were changed, if any, personnel and physician?

22 A. Well, the hospital -- reducing the beds on the
23 behavioral health unit, and we also reduced beds on our
24 pediatric unit, reducing those beds was the last resort
25 that the hospital will turn to in an attempt to save

1 money to address the negative operating margin triggered
2 by the Medicaid reductions. Salaries were frozen. Our
3 pension plan was frozen. Vacation time was reduced for
4 employees. We cut non-clinical programs, funding for
5 the medical library which provides medical resources for
6 our hospital staff, funding to our 55 plus program,
7 which is an outreach program for elderly. Also the
8 hospital decided it could no longer provide the subsidy
9 for our federally qualified health center in Nashua, the
10 Nashua Area Health Center. So that \$500,000 subsidy was
11 cut. Only after all of these other measures were taken
12 was consideration given to cutting clinical programs.

13 Q. And specifically what clinical staff was
14 reduced out of the behavioral health unit?

15 A. Before we began cutting beds we had a
16 full-time equivalent of 42 individuals working for the
17 psychiatric unit. That included physicians, nurses,
18 social workers, and mental health associates. We're now
19 at a full-time equivalent of 23.

20 Q. If a patient with mental illness is unable to
21 get a bed at Southern New Hampshire in the behavioral
22 health unit and has private insurance, what options do
23 they have in your service area?

24 A. They have options that range as far as they
25 can drive or be driven, or an ambulance can take them.

1 It is relatively easy to admit a patient with commercial
2 insurance to any community hospital that has a
3 psychiatric unit to the freestanding private psychiatric
4 hospital within the state, Hampstead Hospital, or to
5 similar units in hospitals in neighboring states. All
6 of those are options for a patient with commercial
7 insurance.

8 Q. Conversely, what options do Medicaid patients
9 who would formerly be treated at Southern New Hampshire
10 in the behavioral health unit, what options do they
11 have?

12 A. Realistically they don't have any options.
13 This is a disadvantage to population who have no
14 advocates, they're disenfranchised. They generally
15 don't have transportation. They don't have financial
16 resources. So going to another town to try and get into
17 a unit in another hospital is usually not an option for
18 them, and when we attempt to transfer people from our
19 emergency room to another hospital because these other
20 hospitals are experiencing exactly the same difficulties
21 that we are, they generally tell us their units are
22 full.

23 Q. Before the state decided to withdraw its
24 \$11.8 million reimbursement for fiscal year 2012, were
25 you consulted by anyone at the Department of Health and

1 Human Services about the impacts that would have on the
2 unit of the hospital you had responsibility for?

3 A. No one consulted me.

4 Q. Were you aware of any public process involving
5 state plan amendment or an opportunity to be heard by
6 the commissioner of Health and Human Services about the
7 impacts for that reduction?

8 A. The first I heard of it was from our chief
9 financial officer when he told me we were probably going
10 to have to close the psychiatric unit at the beginning
11 of July 2011.

12 Q. In any event, you were unaware of any process?

13 A. Totally unaware.

14 Q. You referenced during your testimony some
15 action taken with regard to the pediatric unit?

16 A. That is correct.

17 Q. What has the hospital done with regard to
18 pediatrics?

19 A. Pediatrics was a separate freestanding
20 eight-bed unit staffed by specialized pediatric nursing
21 staff. As with the behavioral health unit, pediatrics
22 is -- the patients are a high percentage of Medicaid or
23 potentially Medicaid eligible people. So they were
24 running deficits similar to the deficits that we were
25 running on the behavioral health unit. Decision was

1 made to close that unit and to open two to four
2 pediatric beds on an adult medical/surgical unit, which
3 is arguably a frightening place for a child.

4 Q. I don't know if you introduced this, but could
5 you describe to the Court what Foundation Medical
6 Partners is?

7 A. Foundation Medical Partners is the outpatient
8 practice division of Southern New Hampshire Health
9 Services, or Southern New Hampshire Health System. The
10 hospital is one part of that organization. Foundation
11 Medical Partners is the outpatient practice which
12 employs physicians to provide services in the Nashua
13 community.

14 Q. As a result of the change in funding from the
15 state or Medicaid reimbursement from the state, has
16 Foundation Partners implemented any changes to patients
17 that it will care for and how?

18 A. Yes, it has. We have not disenrolled all
19 Medicaid patients, but we have decided to close our
20 physician panels to any new Medicaid patients.

21 Q. How many physicians are currently employed?

22 A. Over 200.

23 Q. And so any of those who would have new
24 Medicaid patients would be telling them what?

25 A. They wouldn't be getting in the door.

1 Q. And what are the consequences as a general
2 proposition of not -- the Medicaid population not
3 getting that type of preventive care?

4 A. Well, everyone needs preventive care. Anybody
5 who goes to their doctor on a yearly basis knows that
6 their doctor is concerned about identifying and treating
7 any number of potentially chronic diseases, like
8 diabetes, asthma, hypertension, high blood pressure,
9 cardiac disease, peptic ulcer disease. These are all
10 illnesses that have significant morbidity and even
11 mortality associated with them if they are not
12 identified early and treated. Without access to primary
13 care physicians our Medicaid population will not have
14 these disorders identified early, will not get
15 preventative care, and will end up with more acute
16 illnesses and severe illnesses that may require much
17 more expensive care such as hospitalization.

18 Q. What options do Medicaid patients have in your
19 primary service area for other primary care that's not
20 associated with the foundation?

21 A. There is the Dartmouth-Hitchcock Clinic and
22 the practices of St. Joseph's Hospital. I'm not aware
23 of what their policy is at this point about providing
24 care for Medicaid patients. We also have a federally
25 qualified health center, the Nashua Area Health Center,

1 within the city of Nashua.

2 Q. So if those two other entities are unable to
3 take on these Medicaid patients that will no longer be
4 able to get care at Foundation Partners, do they have
5 any other options in the primary service area?

6 A. Only the Nashua Area Health Center, and they
7 have already had very limited access because of the huge
8 number of patients who are trying to access their
9 services.

10 Q. When is that limitation on new Medicaid
11 patients being enforced?

12 A. I believe now.

13 Q. So if a Medicaid patient in the primary
14 service area makes a call to Southern New Hampshire's
15 Foundation Partners, they will not be seen?

16 A. Correct.

17 Q. Would you please look at Exhibit 82 for ID.
18 Dr. Sullivan, do you recognize Exhibit 82?

19 A. I do.

20 Q. Would you describe for the Court what it
21 represents?

22 A. This is a summary of the Medicaid rate
23 reductions which have taken place since 2008 for
24 Southern New Hampshire Medical Center.

25 Q. These are the same -- generally speaking, the

1 same categories that you've heard testimony about by
2 previous witnesses?

3 A. That is correct.

4 Q. And this is the impact on Southern New
5 Hampshire Medical Center?

6 A. Specifically, yes.

7 Q. Okay. And if you look at the total line
8 across from the period 2008 until 2013, what does that
9 total line represent, sir?

10 A. That represents the --

11 Q. What is that number? I'm sorry, just read it
12 for the record.

13 A. The number \$21,218,280.

14 Q. And that includes the upper payment limit
15 reduction. What if we were to not count that, what is
16 the number right above that on total?

17 A. That would bring us down to \$15,022,442.

18 MR. O'CONNELL: Your Honor, I'd offer 82 and
19 ask that the ID be stricken.

20 MS. LOMBARDI: No objection.

21 THE COURT: ID may be stricken on Plaintiffs'
22 82.

23 (Plaintiffs' Exhibit 82 admitted.)

24 Q. Dr. Sullivan, given the implications on
25 patients that you've described today, why are you at

1 Southern New Hampshire taking the actions that you've
2 described?

3 A. Well, although we are a nonprofit hospital,
4 it's still a business and no business can operate for
5 any length of time with a negative margin. Services
6 have to be cut or else the hospital can't pay its bills
7 and cannot borrow money because its bond ratings are
8 reduced.

9 MR. O'CONNELL: Thank you.

10 THE COURT: Thank you, Mr. O'Connell.
11 Attorney Lombardi, you're taking the witness?

12 MS. LOMBARDI: Yes.

13 CROSS-EXAMINATION

14 BY MS. LOMBARDI:

15 Q. Good afternoon, Dr. Sullivan. I'm Laura
16 Lombardi. I have a few questions for you.

17 A. Good afternoon.

18 Q. You testified earlier about increasing
19 difficulties in the ER over the last two to three years;
20 correct?

21 A. That is correct.

22 Q. And those difficulties occurred before the
23 decision was made to cut the beds, the number of beds in
24 the behavioral health unit; correct?

25 A. We had already started bed reductions at that

1 point. We had reduced from 30 beds to 18 beds in the
2 spring of 2009.

3 Q. And your utilization rates, you testified that
4 you cut your capacity from 28 beds to 10 beds. So
5 actually now you're saying from 18 beds to 10 beds;
6 correct?

7 A. The cut was -- in July of 2011 was from 18 to
8 10. But that was part of a cumulative cut over a period
9 of two years.

10 Q. So before these changes, you testified the
11 change -- the reductions between 2011 and 2012, you had
12 already cut beds prior to that time; correct?

13 A. Although this was not the only factor, the
14 rate reductions that Attorney O'Connell just questioned
15 me about had something to do with that.

16 Q. And Medicaid patients are the smallest
17 population of patients in the behavioral health unit;
18 correct?

19 A. They're about 25 -- Medicaid is 25 percent and
20 uninsured is about 14 percent.

21 Q. And the behavioral health unit is still taking
22 Medicaid patients; correct?

23 A. Of course. Of course we are.

24 Q. So if Medicaid beds are available, those
25 patients are not being turned away?

1 A. That is correct.

2 Q. And if a bed is not available, there are other
3 facilities in the state that have beds available for
4 those patients; correct?

5 A. Not always.

6 Q. But you don't know that personally?

7 A. Well, I know from personal experience as a
8 supervisor for the emergency room the frustration that
9 we experience trying to admit patients to those beds and
10 they are considerable. Patients -- we often have to
11 work out safety plans for patients to send them home
12 rather than send them to a hospital and hope that they
13 will get the care that they need on an outpatient basis,
14 which is problematic because waiting lists are
15 frequently long for outpatient evaluation and treatment.

16 Q. But if a patient does need an inpatient bed,
17 generally there is a facility in the state that has a
18 bed available for them; correct?

19 A. No.

20 Q. No? You testified earlier about Foundation
21 Medical Partners closing their panels to any new
22 Medicaid patients; correct?

23 A. Um-hum.

24 Q. But there are still primary care physicians in
25 the Nashua area that are still taking Medicaid patients;

1 correct?

2 A. I don't know the answer to that question.

3 Q. But there is a federally qualified healthcare
4 center that takes the Medicaid patients?

5 A. Correct, the Nashua Area Health Center.

6 Q. And your hospital is a member of the New
7 Hampshire Hospital Association; correct?

8 A. Yes, it is.

9 Q. And New Hampshire Healthcare -- I'm sorry, the
10 New Hampshire Hospital Association keeps you informed
11 about upcoming changes to reimbursement rates in terms
12 of budget changes?

13 A. I believe they inform our administration.
14 They don't inform me personally.

15 Q. But that association does lobbying on your
16 hospital's behalf?

17 A. Yes, they do.

18 MS. LOMBARDI: I have no further questions.

19 THE COURT: Any redirect?

20 MR. O'CONNELL: Nothing further, your Honor.

21 THE COURT: Thank you, Dr. Sullivan. You're
22 excused.

23 MR. O'CONNELL: Next witness is Jill Batty,
24 please.

25

1 JILL BATTY

2 having been duly sworn, testified as follows:

3 THE CLERK: Would you please state your name
4 and spell your last name for the record.

5 THE WITNESS: Jill Batty, B A T T Y.

6 DIRECT EXAMINATION

7 BY MS. O'CONNELL:

8 Q. Ms. Batty, where do you live?

9 A. I live in Keene, New Hampshire.

10 Q. Where are you employed?

11 A. Cheshire Medical Center in Keene.

12 Q. And what's your position with Cheshire?

13 A. I'm the chief financial officer.

14 Q. How long have you been the chief financial
15 officer at Cheshire?

16 A. Seven years.

17 Q. And how long have you been involved in
18 healthcare administration?

19 A. 25 years.

20 Q. Would you describe for the Court generally
21 what Cheshire Medical Center is?

22 A. Cheshire Medical Center is an acute care
23 hospital with 169 licensed beds. We have acute
24 inpatient and outpatient services and we are working in
25 partnership with Dartmouth-Hitchcock Keene Physician

1 Practice under our joint operating agreement, and we are
2 the only provider of acute care services in Cheshire
3 County.

4 Q. Does that mean you're really the only hospital
5 in Cheshire County?

6 A. We are the only hospital.

7 Q. And do you serve Medicaid patients?

8 A. We do.

9 Q. Approximately what percent of the Medicaid --
10 strike that. Would you identify for the Court what the
11 mission of Cheshire Medical Center is?

12 A. We have a mission of promoting community
13 health in Cheshire County. We operate under Vision
14 2020, which is about making Cheshire County the
15 healthiest community in the nation by 2020. That
16 involves providing appropriate acute and preventive
17 services for our population, but also promoting health
18 for the general population.

19 Q. Do you have any specific designations in the
20 Cheshire Medical Center?

21 A. We are designated as a world referral center
22 under the Medicare program, which basically represents
23 the fact that we have a specialized medical practice in
24 our community that is unique in a rural environment and
25 offers some special reimbursement opportunities under

1 the Medicare program. And we're also designated as a
2 Medicare dependent hospital, which means our inpatient
3 volume is highly dependent on Medicare. Over 60 percent
4 of our new patients are Medicare patients.

5 Q. What does that mean about the population you
6 serve?

7 A. Well, we have an elderly population in
8 Cheshire County, and I guess that would summarize it.

9 Q. Now, do you -- or have you ever under the
10 mission you just described made any distinction on
11 services you would provide based on payer status?

12 A. No, we have not.

13 Q. Have you had to confront a change to that
14 policy because of circumstances?

15 A. We have. We've always had a very open
16 environment to accept patients in our organization.
17 Because we are responsible for community health and
18 having the services available for our primary service
19 area community, we are limiting access to our services
20 for residents outside of that primary service area.

21 Q. What specific limitations are you imposing?

22 A. At present we have closed our physician
23 practices for accepting new -- our primary care
24 practices for accepting new patients who are covered by
25 Medicaid or do not have insurance. So if they live

1 outside of our primary service area, they cannot begin
2 receiving care from our primary care physicians.

3 Q. Your primary service area includes what?

4 A. Cheshire County less the towns of Dublin,
5 Jaffrey and Rindge. So all Cheshire County except for
6 those three communities.

7 Q. Are you familiar with the year-over-year
8 financial impact of the state's funding decisions from
9 fiscal year 2011 to 2012?

10 A. I am.

11 Q. Would you describe for the Court the impact at
12 Cheshire Medical Center -- strike that out. What was
13 the total UCC payment that Cheshire received in 2011?

14 A. \$6,454,494.

15 Q. And in 2012 you received what?

16 A. Zero.

17 Q. What in addition to what you've described are
18 you doing at Cheshire Medical Center to deal with that
19 loss of funding year-over-year?

20 A. Year-over-year not only for this loss of
21 funding but for the rate reductions that I'm sure we'll
22 talk about, we have seen our operating margin decline
23 year-over-year at Cheshire Medical Center. We've been
24 really focused on trying to be able to maintain our
25 services and meet our mission, so we've accepted

1 declines in our operating margin versus cutting back on
2 services.

3 For this particular year our primary focus has
4 been on reducing the costs within our control. We had
5 no wage increases. We eliminated our discretionary
6 match on our employees' pension contributions and we
7 eliminated a short-term disability program for
8 employees.

9 And then we've also been very focused on
10 managing our staffing level, making sure that our staff
11 are absolutely as productive as possible. We've pretty
12 much reached the end of that path. We are somewhere
13 between the 25th and 30th percentile of expense per
14 case, which means we're very low for organizations of
15 our type. At this point our only options are service
16 reduction in order to meet these reduced reimbursements.

17 Q. If the limitations and actions you've
18 described are interdictions during the next 12 months,
19 what other options is Cheshire considering as far as
20 service limitations?

21 A. We have an inpatient psychiatric unit. It is
22 18 beds, and that will probably be our next step, is to
23 close that unit similar to this decision by Southern New
24 Hampshire.

25 We are considering limiting access to -- our

1 first line of access has been elimination of new
2 non-primary service area residents to our primary care
3 practices. We may have to choose to discharge existing
4 patients in our primary care practices who either don't
5 have insurance or covered by Medicaid if they live
6 outside our service area.

7 We've initially taken only approaches with
8 primary care access. Our next level on that would be to
9 discontinue accepting specialty referrals for residents
10 outside our primary service area. Particularly in high
11 cost practices that have like high drug cost or high
12 medical intervention practices or oncology practices,
13 both medical and radiation oncology, and rheumatology
14 which is treated with a lot of drug interventions and
15 allergy, are our primary area of focus where we are
16 likely to close access for residents outside our service
17 area.

18 Q. So with regard to possible changes to service
19 in the future, what do you believe the impact would be
20 on Medicaid patients?

21 A. In the inpatient psychiatric unit we have
22 about 180 discharges per year that are Medicaid. For
23 the specialty referrals for Medicaid we have around 75
24 Medicaid patients per year coming from outside our
25 service area, those specific practices, and we currently

1 have 400 Medicaid patients enrolled in our primary care
2 practice who live outside our primary service area. So
3 it all adds up to be around 625 patients affected.

4 Q. Is that for things that have been implemented
5 or that could be?

6 A. No, those will be implemented. As far as
7 what's been implemented, we've had the policy in place
8 of not accepting the out of area primary care for three
9 months, and at the rate we're going it's about 50
10 patients a year. Half of those currently have Medicaid,
11 the other half are uninsured. I'm not certain whether
12 or not they might have been qualified for Medicaid, but
13 they don't have insurance and we're not accepting those
14 either. So 25 we know are affected.

15 Q. And that could grow to that 600 number if you
16 implement the changes that you've described that are
17 being considered?

18 A. Correct.

19 Q. Were you aware of any process by the
20 Department of Health and Human Services to assess the
21 impact to Cheshire -- actually the Medicaid patients in
22 connection with the reduction of the UPL patient
23 payments?

24 A. No.

25 Q. Were you consulted by anyone in the department

1 about what the impacts would be at any time?

2 A. No.

3 Q. Are you aware of any state -- public process
4 associated with state plan amendments with regard to the
5 reductions of UPL before they are implemented?

6 A. No, I am not.

7 Q. I'd ask you to look at Exhibit 69 marked for
8 ID. Ms. Batty, do you recognize that exhibit?

9 A. I do.

10 Q. What is it?

11 A. It's a summary of the impact of the rate
12 reductions since 2008 projected forward to 2013 for
13 Cheshire Medical Center.

14 Q. Did you compile this information?

15 A. I did.

16 Q. And similarly, does it capture the rate
17 reductions we've heard other -- impact Cheshire Medical
18 Center for rate reductions by categories listed on the
19 left?

20 A. Yes.

21 Q. And what are the total -- what is the total
22 financial impact for the rate reductions for 2008
23 through 2013 without including overpayment amount?

24 A. \$11,910,711.

25 Q. As a practical matter what does that mean to

1 Cheshire?

2 A. We're a \$150 million organization per year,
3 and if you look at the number there for the most recent
4 -- well, since 2010 that's two and a half million
5 dollars per year reduction in our revenue. So we've
6 operated with a margin that is less than that for each
7 of those years, and so essentially it has eliminated any
8 opportunity to have an operating margin, which we then
9 -- the operating margin is what we reinvest in our
10 facilities and in our programs and our people, and
11 that's really where the cuts are coming.

12 Q. With regard to the category cuts referenced in
13 Exhibit 69, were you aware of any public process
14 connected with state plan amendments to effect these
15 changes?

16 A. No.

17 MR. O'CONNELL: Your Honor, I'd offer
18 Exhibit 69.

19 THE COURT: Any objection?

20 MS. LOMBARDI: No objection.

21 THE COURT: ID may be stricken on Plaintiffs'
22 69.

23 (Plaintiffs' Exhibit 69 admitted.)

24 MR. O'CONNELL: I have no further questions.

25 THE COURT: I have a question. Is there

1 somewhere an expression of these rate reductions in
2 terms of like percentages and comparatives?

3 MR. O'CONNELL: Only with regard to inpatient,
4 outpatient and family practice. Those are in the
5 declarations. Not for these specific categories, your
6 Honor.

7 THE COURT: How were they accomplished? Were
8 they accomplished by percentage rate, reductions of
9 rates?

10 MR. O'CONNELL: Oh, I'm sorry. Yes, with
11 regard to -- well, let me turn to my partner, Mr.
12 MacDonald, who knows the details of some of this.

13 MR. MacDONALD: Your Honor, in the outpatient
14 reduction there was a 33 percent more or less rate
15 reduction which took place in November of 2008. On the
16 inpatient rates there was a ten percent rate reduction
17 which took place on November 2008. The other rate
18 reductions in the case are not those kind of
19 across-the-board cuts, but I think you'll hear testimony
20 on what they were as a function of the total amount
21 that's being paid.

22 THE COURT: Thank you, appreciate it.

23 MR. O'CONNELL: Your Honor had asked us to pay
24 attention to (13)(A) issues and the witnesses tomorrow
25 will be doing that. Today they're appearing about

1 impacts. Unfortunately, that was the way we had
2 organized the day and we will put up some of that
3 tomorrow.

4 THE COURT: Okay, appreciate it. Attorney
5 Lombardi?

6 CROSS-EXAMINATION

7 BY MS. LOMBARDI:

8 Q. Good afternoon. I believe you testified that
9 your hospital serves -- approximately 60 percent of the
10 patients are Medicare; is that correct?

11 A. On the inpatient side, that's correct.

12 Q. On the inpatient side. And with regard to
13 Medicaid, your declaration indicates that only
14 5.8 percent of the medical center's total revenue comes
15 from Medicaid; is that correct?

16 A. I believe it's actually slightly lower than
17 that, but yes, that's right.

18 Q. And you did not expect to make a profit from
19 treating Medicaid patients; correct?

20 A. That's correct.

21 Q. If you could turn to Plaintiffs' Exhibit 69?

22 A. I have it.

23 Q. That you just testified to about the losses
24 that you claim that Cheshire Medical Center has
25 experienced. The third line down, Revenue Code 510, you

1 have that listed as a rate reduction. That wasn't
2 essentially a rate reduction. Was it instead a -- it
3 was an improper billing practice that was corrected; is
4 that correct?

5 A. Well, no, I don't believe so. It was a change
6 in policy by the Medicaid program as to how they would
7 pay for provider based physician practices. The
8 hospitals that were affected by this have been following
9 Medicare guidelines about provider based practices.
10 Cheshire was one of those providers, and Medicaid made
11 basically a unilateral change in policy about payment
12 which resulted in this reduction.

13 Q. And it had to do with the way that you
14 reported, not necessarily a reduction in rates; correct?

15 A. Well, prior to that we were receiving a higher
16 payment for physician based services that were provided
17 to Medicaid patients and at the end of the change in
18 policy we were receiving a million dollars less.

19 Q. And you also list the upper payment limit as a
20 rate reduction over the three years of 2011, '12 and
21 '13. The upper payment limit, wasn't that in fact a
22 one-time payment made based on the fact that there are
23 funds available for a one year's time?

24 A. The state presented the upper payment limit to
25 the hospitals with the information for us to understand

1 that it was an upper payment limit, payment one time in
2 2010. We don't know what prior payment -- prior DSH/MET
3 reimbursement payments were based on. The calculation
4 details were not shared with us. So I can't speak to
5 whether or not prior period payments were associated
6 with upper payment limits.

7 The administration of the MET/DSH program have
8 put certain requirements on the state as to how the
9 payments are calculated and processed, and we know that
10 in 2010 in order for them to be processed in the way
11 that they were -- they had to include an upper payment
12 limit payment to the different providers. We would
13 assume that since the payment levels were similar in
14 2010 as the prior years, that the methodology would have
15 included an upper payment limit calculation, but that
16 was not shared with us.

17 Q. But you're not as familiar with this area.
18 You're not familiar with the difference between DSH
19 payment and upper payment limit?

20 A. As familiar as -- I'm not sure --

21 Q. As perhaps other witnesses who could testify
22 to that issue?

23 A. I don't know. I feel pretty familiar with it.

24 Q. But it was a one-time payment. It was not a
25 DSH payment, it was a one-time upper payment limit

1 payment made in 2010?

2 A. That's how it's been presented to us recently.

3 Q. And you testified that physician panels have
4 been closed to new Medicaid patients coming in from
5 outside your service area; is that correct?

6 A. Correct.

7 Q. There are other providers in those areas of
8 the state who do still accept Medicaid patients;
9 correct?

10 A. I don't know that. Probably. I don't know.
11 I will just state we don't have a federally qualified
12 healthcare center in the Monadnock Region, so that sort
13 of last safety net provider is not available to the
14 residents of our primary or secondary service area, and
15 the ones that are being refused by Cheshire/
16 Dartmouth-Hitchcock concurrently are in a secondary
17 service area and don't have access to another federally
18 qualified healthcare center.

19 Q. And your hospital is a member of the New
20 Hampshire Hospital Association?

21 A. Yes.

22 Q. And they lobby on your behalf?

23 A. Yes, they do.

24 MS. LOMBARDI: I have no further questions.

25 THE COURT: Any redirect?

1 MR. O'CONNELL: Yes, your Honor, briefly.

2 REDIRECT EXAMINATION

3 BY MR. O'CONNELL:

4 Q. Now, Ms. Batty, you were asked questions about
5 UPL and whether it was a one-time payment or not. I
6 want to clarify the record. Are you aware that on --
7 that in 2010 with an effective date of November 19,
8 2010, two years ago, the state issued a state plan which
9 said that the UPL would be an annual payment? Are you
10 aware of that fact?

11 A. I have seen that in correspondence from the
12 Hospital Association.

13 Q. And there was a similar document, SPA, filed
14 with the same effective date for inpatient rates; isn't
15 that true?

16 A. Yes.

17 Q. As you sit here today, you haven't seen this
18 to speak about it; is that fair to say?

19 A. I'm sorry?

20 Q. You haven't studied this --

21 A. No, I have not.

22 Q. -- to give the Court informed testimony about
23 all those details; is that fair to say?

24 A. No, that's correct.

25 Q. Okay. But it is true that if the state amends

1 its state plan amendment to say it's going to make a
2 certain payment, it's got to make that payment unless it
3 amends the plan; isn't that true?

4 A. It's my understanding.

5 MR. O'CONNELL: Nothing further.

6 MS. LOMBARDI: Thank you, ma'am.

7 THE COURT: Thank you, ma'am. Why don't we
8 take a brief break. Ten minutes.

9 (Recess taken.)

10 THE COURT: Mr. O'Connell.

11 MR. O'CONNELL: Thank you, your Honor. We
12 call John Marzinzik.

13 JOHN MARZINZIK

14 having been duly sworn, testified as follows:

15 THE CLERK: Would you please state your name
16 and spell your last name for the record.

17 THE WITNESS: John, J O H N, Marzinzik, M A R
18 Z I N Z I K.

19 DIRECT EXAMINATION

20 BY MR. O'CONNELL:

21 Q. Good afternoon, Mr. Marzinzik.

22 A. Good afternoon.

23 Q. Where do you live, sir?

24 A. I live in Elliot, Maine.

25 Q. Where are you employed?

1 A. At Frisbie Memorial Hospital in Rochester, New
2 Hampshire.

3 Q. And what is your position at Frisbie Memorial
4 Hospital?

5 A. I am the vice president of finance and chief
6 financial officer.

7 Q. And what do your duties and responsibilities
8 include in that position at Frisbie?

9 A. I oversee all of the financial applications of
10 the hospital, handle all the bank business, investment
11 portfolios. I oversee all the facility's plant
12 maintenance, safety. I'm also corporate compliance
13 officer.

14 Q. Could you describe Frisbie for the Court?

15 A. Frisbie is a small acute care general hospital
16 licensed for 112 beds. We also have a specialty unit
17 for geriatric psychiatry which is a ten-bed unit.

18 Q. What is its primary service area?

19 A. Primary service area is the Rochester,
20 Farmington, and Milton area.

21 Q. And what's its extended primary service area?

22 A. Through Somersworth, the Berwicks, Barrington.

23 Q. On the easel in front of you is a table that
24 we used -- we used it once earlier today from
25 Exhibit 50, and it's the state's calculation of the

1 Medicaid population. Is the area located for Rochester,
2 is that where Frisbie's extended service area is?

3 A. Yes, it is.

4 Q. And for the record, what is the percent of the
5 total population that's Medicaid enrolled in Rochester?

6 A. 16 percent.

7 Q. And the total number is what?

8 A. 7,238 Medicaid patients.

9 Q. What does that suggest to you about the
10 general demographics of that primary service area?

11 A. It is very much a blue collar community. They
12 have been hit by Cabletron leaving, Thompson Center Arms
13 going out. They have had -- it's a tough economic
14 community.

15 Q. How long have you been there?

16 A. I have been there for 19 years in July.

17 Q. How long have you been involved in healthcare
18 administration?

19 A. Since '77, so 34 years. 33 years.

20 Q. What is the mission of Frisbie Memorial
21 Hospital?

22 A. To provide safe, effective, efficient,
23 equitable, timely patient-centered care to everybody in
24 the community.

25 Q. Has anything changed or made changes as a

1 result of funding decisions by the State of New
2 Hampshire?

3 A. Unfortunately, yes, it has.

4 Q. Would you describe, please, what you're
5 planning for at Frisbie?

6 A. Because of the cuts that we are now
7 experiencing with Medicaid, specifically the Medicaid
8 Enhancement Tax that we just had to pay our \$4 million,
9 we have had to change our charity care policy.
10 Previously it was 300 percent covered in full. It is
11 now down to 200 percent with a sliding fee scale, which
12 we have never done historically.

13 We have had to change our staffing emergency
14 room which will be effective in March. We are actually
15 going from having three full-time physicians onboard
16 24 hours down to two.

17 We are capping our primary care adult services
18 on our employed physicians at a seven percent level.
19 We've looked at what we have for volumes in each
20 practice. We've decided that seven percent is about as
21 high as we can go and still grandfather in existing
22 patients, which means that we are closing six providers
23 in the community leaving only three open for potentially
24 new patients.

25 We have had to make the decision that we

1 cannot -- we can no longer support a thoracic program at
2 the hospital and have notified the physician that we
3 will not be renewing his contract. So that Medicaid
4 patients seeking thoracic surgery -- or thoracic
5 services in Rochester will now have to seek services
6 somewhere else.

7 We had a -- our oncologist was traveling up to
8 Huggins in Wolfeboro a couple times a month to see the
9 patients up there so they wouldn't have to travel.
10 We've had to stop that as well and he's now home-based
11 at Frisbie. They will either seek services elsewhere or
12 they'll now have to drive the hour to come down and see
13 the doc down here.

14 Q. In the 19 years that you've been at Frisbie,
15 have you ever previously determined what services would
16 be provided to a patient based on payer class?

17 A. When I first got to Frisbie in '93, I was
18 coming over from Exeter Hospital, where I had worked for
19 five and a half years before that. Frisbie was and
20 still is a very tough community. It is not well-endowed
21 in many senses. Working with my staff down in the ED it
22 was pretty obvious that the way that they treated
23 patients was not equitable. On every patient wristband
24 they had a big mark as to what they had for financial
25 class, and it was not a surprise that Medicaid and

1 self-pay patients were treated differently than the
2 others.

3 Within the first week I had those removed. I
4 had the financial class taken off the patient's sticker
5 which is on the face sheet of all the charts to the
6 chagrin of many of the physicians who didn't like it,
7 but that's because we believed strongly at the time, and
8 still do, that regardless of your ability to pay, you
9 should be treated the same. And to put hospitals in the
10 position today that we have to start making economic
11 decisions based on whether they have Medicaid or
12 self-pay patients, whether they have any coverage at
13 all, is wrong. You're hurting patients that you don't
14 see, that you don't hear from, and it's wrong.

15 Q. Are you familiar with the changes in financing
16 for the State of New Hampshire from state fiscal year
17 '11 to '12?

18 A. Yes, sir, I am.

19 Q. Would you summarize for the Court the total
20 amount of UCC payments, uncompensated care payments,
21 that Frisbie Memorial Hospital received in 2011?

22 A. \$8,181,669.

23 Q. And are you scheduled to get anything in this
24 fiscal year?

25 A. No, sir, we're not.

1 Q. What about the next fiscal year?

2 A. No, sir.

3 Q. What have you done to deal with that loss of
4 payment in addition to what you've described?

5 A. We have gone through cost reductions on
6 contracts. We have outsourced all of our facility
7 maintenance housekeeping staff. We have reduced the
8 staffing on all of our med/surg floors. We have changed
9 group buying services from one to the other, which
10 causes some problems internally, but there are some
11 savings that -- enforced savings that will come out of
12 that. As I mentioned, the killing of the thoracic
13 program.

14 Q. Can I turn your attention to the capping of
15 the primary care practices that you described?

16 A. Yes.

17 Q. Have you tried to calculate the number of
18 Medicaid patients you believe will be impacted by that
19 decision?

20 A. Looking at just the last six months and trying
21 to identify those adult acute care patients coming in to
22 our primary care practices, we're probably talking about
23 300 new Medicaid patients a year that are going to have
24 to find services elsewhere.

25 Q. And what specific services will they not be

1 able to get through Frisbie?

2 A. You get a sore throat, you now end up going to
3 the ED. You've got an ear infection, it's the ED. You
4 go in and they're going to treat you as the acute visit
5 that it is. It's not that they're going to give you a
6 30-day prescription. They're going to give you enough
7 medication to last you 24, 48 hours with the instruction
8 to go see a primary care physician. So it's not
9 long-term treatment of an illness, it is the acute
10 episodic illness that they'll treat, and they'll turn
11 them out into the market.

12 Q. Sir, before the total of uncompensated care
13 payments were taken out of the budget, were you part of
14 any process run by the State of New Hampshire to assess
15 the impacts that that loss of funding would have at
16 Frisbie?

17 A. No.

18 Q. Did anybody from the Department of Health and
19 Human Services make an inquiry at Frisbie about what the
20 impacts would be for Medicaid patients by their reduced
21 funding?

22 A. No, sir.

23 Q. Are you aware of any analysis done by the
24 State of New Hampshire to determine how access for
25 Medicaid patients would be impacted by the loss of the

1 \$130 million for these ten hospitals?

2 A. No, sir.

3 Q. Would you look at the exhibit that's in front
4 of you, sir, which has been marked as Exhibit 75 for ID.
5 Do you recognize that document?

6 A. Yes, I do.

7 Q. What is it?

8 A. Those are the reductions by category for
9 Frisbie for years '08 to 2000, projected '13.

10 Q. There are three categories identified for
11 which there is some financial impact at Frisbie?

12 A. Yes.

13 Q. And these are the same categories that have
14 been discussed in other testimony today?

15 A. Yes.

16 Q. With regard to the inpatient rates -- well,
17 let me just summarize. With regard to those three
18 categories identified on this Exhibit 75, what is the
19 total impact for the period 2008 through 2013?

20 A. Inclusive of the projected upper payment limit
21 it was 15,935,587.

22 Q. Okay, and if you exclude the upper payment
23 limit which is factored in Exhibit 63 and 64, what is
24 the total impact at Frisbie?

25 A. \$11,611,732.

1 Q. With regard to these category cuts, were you
2 aware of any public process for state plan amendments to
3 assess the impact of those reductions at Frisbie?

4 A. Not that I know of.

5 Q. Were you aware of any assessment by the State
6 of New Hampshire to determine what the impacts would be
7 at Frisbie for those categorical cuts?

8 A. No.

9 Q. Mr. Marzinzik, what else is on the table for
10 consideration at Frisbie in the event that changes you
11 have made already are not sufficient to deal with the
12 financial circumstance you've described?

13 A. We have to go back and look at whether or not
14 we're going to be talking layoffs again. Whether we
15 will be eliminating more services at the hospital,
16 whether we can afford to keep all practices open, the
17 times we do. It's a general across-the-board slash and
18 burn at that point.

19 I mean, it is not that we haven't already --
20 when they arbitrarily reduced the rates back in '08,
21 '09, at that point in time when they put us in the
22 position, we had to go borrow money from our line of
23 credit for the first time in 18 years; that we had at
24 that point laid off 25 people, reduced the hours of
25 another 106, froze all wages for over a year. We

1 stopped the funding of the 403(b), our pension plan, for
2 our staff. We outsourced people then.

3 We recovered enough over the year to pay our
4 bills. We were forced -- we went into technical default
5 on our bonds. We have since over this past year come
6 out of that technical default. But these payments, we
7 can't afford these kind of -- it will put us back in
8 technical default again.

9 Q. What are the implications of a technical
10 default?

11 A. Because of the nature of the bond agreement
12 that we have, it's called a swap agreement, that if we
13 go into technical default, we have to fund what they
14 call the mark to mark, the variability of the bond's
15 collateral if you will. We will need to put
16 \$6.8 million into Bank of America's bank as collateral.
17 By doing that, it takes our ability to use those funds
18 for any emergency that we have out of play. It is not
19 available to us.

20 Q. So in addition to the lack of the funding, you
21 have money that you can't touch for servicing
22 obligations; is that a fair statement?

23 A. That's correct.

24 Q. Why are you doing all of the things that
25 you've described here today?

1 A. We feel very strongly about our community.
2 When we did an addition to the building in 2008 to
3 modernize the facilities we offered to the community, we
4 went all private rooms for efficiency reasons, if
5 nothing else, which we do not charge any higher premium
6 for the private room to any patient. Again, to be
7 treated the same, with the same dignity and respect that
8 we do every day. And we worked hard at making sure that
9 every patient that comes in our doors are treated the
10 same, the same respect. We're polite.

11 So that it's an incredibly friendly hospital
12 and that is what we've maintained, and we try to keep it
13 as part of the community so the community feels very
14 welcome, whether they're visiting patients, whether
15 they're coming in for lunch, whether they're just coming
16 in to visit somebody or shop in the gift shop. We try
17 to make it and be a very interactive part of the
18 community. We've had those goals. We've built a strong
19 facility. We have a check and balance sheet. We have
20 done some amazing things for our community and we're
21 very dedicated to our community, and that's being torn
22 apart.

23 Q. What's necessary in order to reverse the
24 decisions that you've made?

25 A. If the state would adequately fund their share

1 for just their patients. We no longer have the ability
2 to cost shift. When the state is paying less than what
3 it costs -- if I buy a pill for a dollar, they're paying
4 me 50 cents. So somebody else has to pay that extra 50
5 cents.

6 Historically, you go back 10 or 15 years and
7 there was maneuverability within the negotiation of the
8 commercial insurance contracts, who probably paid \$1.30
9 for that pill to help fund those patients that couldn't
10 afford it. It was their way of paying part of your
11 uncompensated care and your bad debts in the community.

12 Contracts today are capped. So we're allowed
13 maybe a three to a four percent rate increase that we
14 can pass on to the insurance companies. Anything else
15 we eat. We have to absorb it into our system.

16 The subsidy that we pay for our employed
17 physicians, we subsidize our employed physicians to --
18 in this past fiscal year ending 9/30/11 some \$890,000,
19 and that's not including any fringe benefits for the
20 staff. That's just direct costs to those practices.
21 That's an \$890,000 loss which we absorb and really fund
22 through the hospital. In the end it's just one pot of
23 money, and however you divide it up and toss it back and
24 forth, the bottom line is the bottom line.

25 MR. O'CONNELL: I have no further questions.

1 THE COURT: I have a question. I'm not sure I
2 can even articulate it properly, but these numbers -- I
3 asked you about the percentage rates, but I assume what
4 you're driving at here is that the reduction in rates
5 applicable to Medicaid patients is causing this problem,
6 but you always throw in the tax, the MET. That's not
7 technically a Medicaid reimbursement rate, is it?

8 MR. O'CONNELL: I can address that to the
9 Court --

10 THE COURT: Please. Thank you.

11 MR. O'CONNELL: You're right to observe that
12 they're related, but they are distinct. The projected
13 MET still has to be paid. It used to be offset by
14 payments, and so now that's just a revenue payment on
15 the bottom line that's --

16 THE COURT: It's a tax.

17 MR. O'CONNELL: It's an old tax.

18 THE COURT: Used to be reimbursed but now it's
19 collected.

20 MR. O'CONNELL: It used to be neutral.

21 Q. In fact, Mr. Marzinzik, would you explain to
22 the Court from 1993 until 2010, what was the impact on
23 hospitals financially for payment of the MET?

24 A. There was zero impact.

25 Q. Could you describe why?

1 A. Certainly. The way the methodology worked,
2 and it goes back to a letter that the Senate gave to the
3 Hospital Association, said that we have a way of getting
4 additional federal funds on the state budget, but it is
5 our intent to hold you harmless, and I think that letter
6 is public information.

7 The way it would work is they would determine
8 what their tax is going to be and our net patient
9 service revenue, which they very loosely defined in
10 those days. It didn't matter because we tried to help
11 the state get it as high as possible so they would get
12 more matching funds. They would tax the hospital in
13 theory, but it always turned out that at the same time
14 once they determined what the tax was going to be, they
15 would make a determination as to what the DSH payment,
16 the disproportionate share payment, was to the hospitals
17 and, lo and behold, they were exactly the same.

18 The way it worked is they would wire the DSH
19 payment into our bank account and we had 15 minutes to
20 turn around and wire it back to the state. So I believe
21 they funded the first hospital, went through the
22 transfer, second hospital, went through the transfer.
23 So they are using one pot of money to recycle it all the
24 way through so they could turn around to the federal
25 government and receive their matching share.

1 THE COURT: And you're going to relate that to
2 Medicaid.

3 MR. O'CONNELL: I'm going to relate that right
4 now.

5 Q. Can you describe what Exhibit 93 is?

6 A. That is the history of the MET/DSH payments to
7 the general fund.

8 Q. Now, the red line on the bottom is a net to
9 hospital that you were just describing. That's flat
10 from '93 until 2010, when it spikes up, and there is a
11 net payment to the hospital; right?

12 A. That's correct.

13 Q. And then it drops to the floor?

14 A. That's correct.

15 Q. Now, that happens at the same time -- that gap
16 happens at the same time the state makes the decision
17 not to make UPL or DSH payments; isn't that true?

18 A. That's correct.

19 Q. So you have two things that are colliding that
20 affect your bottom line at Frisbie and the other ten
21 hospitals are having at the same time; isn't that true?

22 A. Yes, sir.

23 Q. You have a change of administration of a tax
24 that used to be neutral that is no longer neutral; is
25 that fair to say?

1 A. That's correct.

2 Q. And in fact in 2011 it actually got good for
3 the hospital. There was a net payment from the state in
4 UPL addition \$8.2 million. And that's shown on Exhibit
5 No. 93 where there's that little blip when things got
6 better. True?

7 A. Yes, sir.

8 Q. And then in 2012 the bottom falls out of this;
9 is that true?

10 A. Yes, sir.

11 Q. Now, that top blue line is the amount that has
12 been moved to the general fund; isn't that true?

13 MS. LOMBARDI: Objection. I've let it go for
14 a while, but it's getting very leading.

15 THE COURT: I'll take it as argument, but just
16 inform me.

17 MR. O'CONNELL: I would say that the actual
18 numbers are from state's Exhibit 49, and it shows that
19 \$1.8 million has been moved from 1991 to 2011 into the
20 general fund.

21 THE COURT: The first numbers are actually I'm
22 finding a little easier on the issue that I think we're
23 here to decide, and so I mean -- I posit the following
24 argument: The reduction in Medicaid rates that you're
25 talking about don't give rise to any irreparable injury

1 here that would warrant injunctive relief. Why?
2 Because that's not the reason that Medicaid services are
3 being curtailed for Medicaid patients. The reason is
4 because the state's decided to actually collect the tax
5 and not rebate the amount of the tax to make it neutral.
6 And what's your response to that?

7 MR. O'CONNELL: Yes, your Honor. Well, the
8 response is that the state absolutely has the right to
9 do that. It has to go through a public process getting
10 state plan amendment on file where everyone has the
11 opportunity to get their input in and file it and get it
12 approved --

13 THE COURT: With respect to what? Not the
14 tax. The DSH payment maybe.

15 MR. O'CONNELL: UPL, absolutely. UPL is a
16 rate subsidy according to Mr. Lipman that is calculated
17 on the amount of services that makes up the difference
18 between what Medicaid pays and what Medicare pays.

19 THE COURT: All right. Go back and do that
20 again.

21 MR. O'CONNELL: Yeah, sure. Mr. Lipman's
22 testimony was that UPL is a form of rate enhancement.
23 And the way it's calculated is that you are looking at
24 the delta between what Medicaid would pay for the
25 services and what Medicare would, and you can do the

1 enhancement up to what Medicare would pay. And that's
2 how UPL is determined and it's paid. And the state
3 offered a plan amendment that said we're going to pay
4 this on an ongoing basis. Didn't do it for this year,
5 and after they defunded it issued a state plan
6 amendment. You're going to hear about that from the
7 state witnesses. They did it after the fact. No public
8 comment, no (30)(A) issues, no looking at the impact on
9 patients by taking that money, which is rates, away.
10 State says UPL is not rates. That's going to be a legal
11 question for you to determine.

12 THE COURT: And the tax is not an issue then
13 in your view.

14 MR. O'CONNELL: It's just a revenue impact.
15 It's a historical anomaly that happens at the same time
16 these are taken out. So I will say it this way. When
17 you're trying to determine whether you're paying a fair
18 wage to enlist enough providers to provide the services
19 in the market, the 38 standard, you've got to look at
20 the impact of your scheme on the providers. And the
21 state never did a public process to look at the
22 implementation of the MET that historically had been
23 neutral in the change to say how is this going to affect
24 the --

25 THE COURT: Why does the MET have to go

1 through that process? The MET is simply an imposition
2 of a state tax.

3 MR. O'CONNELL: It's just a relevant issue as
4 to what they have -- if they're going to have to pay
5 that, it comes off the bottom line and they can't
6 cross-subsidize, and they're going to take UPL out,
7 well, then you have the circumstance --

8 THE COURT: You mean they have to consider it
9 in the sense that they're deciding what the UPL will
10 be --

11 MR. O'CONNELL: Yes.

12 THE COURT: -- and that's a function of that.

13 MR. O'CONNELL: It's a function of how they
14 can afford to provide the services and is it sufficient
15 to enlist enough providers to make it equal --

16 THE COURT: Because under the circumstances
17 that we are going to now collect this tax, now the UPL
18 looks different.

19 MR. O'CONNELL: Exactly right, thank you.
20 It's relevant only in that respect, your Honor.

21 THE COURT: Appreciate it. Thank you.

22 MR. O'CONNELL: Exhibit 93 is taken from data
23 that is a full exhibit, Exhibit 49, and I'd offer it at
24 this time.

25 THE COURT: Any objection?

1 MS. LOMBARDI: Which exhibit?

2 MR. O'CONNELL: This is the graph.

3 MS. SMITH: There's been no foundation for it.

4 MS. LOMBARDI: Yeah, I object. This witness
5 did not produce this. Foundation.

6 MR. O'CONNELL: The data is coming from the --
7 well, okay. That's fine. We'll use the state witness
8 then. Thank you, your Honor.

9 THE COURT: Thank you.

10 MR. O'CONNELL: Nothing further from me, your
11 Honor. Thank you.

12 THE COURT: Attorney Lombardi?

13 CROSS-EXAMINATION

14 BY MS. LOMBARDI:

15 Q. Hi, Mr. Marzinzik. I hope I got that right.

16 A. Yes, you did.

17 Q. If you could please turn to Plaintiffs'
18 Exhibit 75. I think it might be up there with you?

19 A. Yes.

20 Q. You testified about that a few minutes ago?

21 A. Yes, I did.

22 Q. And that includes the upper payment limit that
23 was just being discussed?

24 A. Um-hum.

25 Q. The 2010 payment of the upper payment -- the

1 upper payment limit payment made in 2010, is it your
2 understanding that that was a one-time payment? It was
3 intended as a one-time payment because the availability
4 of RA funds that year?

5 A. No, my understanding was that that was
6 something we were going to receive going forward.
7 That's what the state plan amendment said.

8 Q. That's your understanding?

9 A. Um-hum.

10 Q. You also testified about your primary care
11 offices instituting a seven percent cap on Medicaid
12 patients?

13 A. We are allowing up to seven percent Medicaid
14 patients in a physicians panel.

15 Q. And how are you going to track that, where
16 Medicaid patients often go on and off of Medicaid?

17 A. It's just another bookkeeping situation that's
18 been imposed on us that we will count. We have
19 methodologies. We have a system already determined and
20 set up to count patients by payer class. They will be
21 reviewed monthly and they'll be turned on or off at the
22 beginning of every month.

23 Q. In general, you do not expect to make a profit
24 off of Medicaid patients; correct?

25 A. No, I do not. When they only pay 50 percent

1 of cost that would be quite a challenge.

2 Q. And in fact you lose more on Medicare
3 patients; correct?

4 A. No.

5 Q. You do lose on Medicare patients though also;
6 correct?

7 A. Are you talking inpatient, outpatient or
8 physician practices?

9 Q. All of the above.

10 A. There are some situations depending on -- if
11 you're talking annualized in a year, that would be a
12 true statement. It comes close to covering costs on the
13 physician side. On the inpatient/outpatient we do lose
14 some margin on Medicare, that's true. Not to the extent
15 that we lose on Medicare (sic), but it's quite a bit.
16 The loss on Medicaid patients is quite a bit higher than
17 we have in Medicare.

18 Q. But there are other areas that you have lost,
19 not simply Medicaid?

20 A. True.

21 Q. And you testified about a number of changes
22 that might occur in the future. Are you aware that
23 managed care may be implemented?

24 A. And that's a problem, that's correct.

25 Q. But if managed care is implemented, then these

1 rates that we're discussing could change; correct?

2 A. Well, I have talked with six out of the seven
3 companies that proposed -- that made a proposal to the
4 state to be awarded the contract on receiving the
5 Medicaid managed care program, of which they did not
6 know what the rates were yet. I believe that the state
7 put into their budget that they hope to save \$16 million
8 by outsourcing the Medicaid program to a Medicaid
9 managed care program. And if they do that, my
10 assumption is that we're not going to be paid more if
11 the state is looking to save \$16 million on top of what
12 they're not funding today. That would be quite a trick.

13 Q. But you don't know at this point what changes
14 will be made; correct?

15 A. No. I don't think the state does either.

16 Q. And your hospital is a member of the New
17 Hampshire Hospital Association; correct?

18 A. Yes, it is.

19 Q. And they lobby on your behalf?

20 A. Yes, they do.

21 MS. LOMBARDI: I have no further questions.

22 THE COURT: Any redirect?

23 MR. O'CONNELL: I just need to correct the
24 record, your Honor. I incorrectly referenced the source
25 data in Exhibit 93 for ID is a graph, and the source

1 data is a full Exhibit, 45. We will take that up later.

2 THE COURT: Did we strike the ID on 75?

3 MS. O'CONNELL: If I didn't move to, I would
4 like to move -- I think I did.

5 THE COURT: Any objection?

6 MS. LOMBARDI: Which exhibit?

7 THE COURT: 75.

8 MS. LOMBARDI: 75? No objection.

9 THE COURT: ID may be stricken on Plaintiffs'
10 75.

11 (Plaintiffs' Exhibit 75 admitted.)

12 MR. O'CONNELL: Nothing further.

13 THE COURT: Thank you, Mr. Marzinzik. You may
14 step down. I appreciate it. You're excused. And you
15 can call your next witness.

16 MR. MacDONALD: Your Honor, the plaintiffs
17 call Kathleen Dunn.

18 KATHLEEN DUNN

19 having been duly sworn, testified as follows:

20 THE CLERK: Would you please state your name
21 and spell your last name for the record.

22 THE WITNESS: Kathleen Dunn, D U N N.

23 DIRECT EXAMINATION

24 BY MR. MacDONALD:

25 Q. Ms. Dunn, good afternoon. My name is Gordon

1 MacDonald. I represent the plaintiffs in this lawsuit.

2 Could you please tell the Court your current job? Where
3 do you work?

4 A. I work for the Department of Health and Human
5 Services for the State of New Hampshire. I'm the
6 director of the office of Medicaid business and policy.

7 Q. And you're the state Medicaid director; is
8 that correct?

9 A. I'm the designated state Medicaid director.

10 Q. And how long have you been the state Medicaid
11 director?

12 A. Since 2007.

13 Q. And what are your duties as state Medicaid
14 director?

15 A. I oversee a portion of the Medicaid program,
16 predominantly all acute care services, services that are
17 not long-term care related, and within that I'm
18 responsible for preparing budget documents, preparing
19 policy documents, dealing with client service issues,
20 etc.

21 Q. How long have you been employed at the
22 Department of Health and Human Services?

23 A. 18 years.

24 Q. And how long have you been involved in the
25 Medicaid program?

1 A. On and off since the late nineties.

2 Q. And I understand you're a nurse by training;
3 is that correct?

4 A. I am.

5 Q. As part of your duties as the state Medicaid
6 director, do you interact with the state legislature?

7 A. I do.

8 Q. And do you prepare testimony and testify
9 before the state legislature?

10 A. I do.

11 Q. I'd like to show you what's been marked as
12 Exhibit 49.

13 MR. MacDONALD: May I, your Honor?

14 THE COURT: Anytime.

15 Q. Exhibit 49 appears to be a special -- or
16 Powerpoint presentation that was made to the senate in
17 April of 2011; is that right?

18 A. That's correct.

19 Q. And is this a document that you helped
20 prepare?

21 A. Yes, it is.

22 Q. And did you give testimony before the senate
23 on or about April 7, 2001?

24 A. Yes, I did.

25 Q. Okay. We've reproduced two of the slides from

1 your testimony, and I'd like to have you either join
2 with me up here or look at the document in front of you.
3 Start with page 13. And this is a page -- did you
4 prepare this page?

5 A. I did.

6 Q. And it is a page describing Medicaid provider
7 reimbursement rate setting and it lists some
8 requirements under a regulation, 42 CFR 447.252, and it
9 says that state plan includes -- include description of
10 the methods and standards used to set payment rates.
11 And is that your testimony today about what a state plan
12 must include?

13 A. Methods and standards, yes.

14 Q. And the state plan must allow parties to
15 understand the rate setting process, the items and
16 services that are paid through these rates; is that
17 correct?

18 A. Yes, it is.

19 Q. And it must describe how the state's share of
20 each type of payment is funded; is that correct?

21 A. Yes, it is.

22 Q. And you say there, e.g., legislative
23 appropriation. What do you mean by that?

24 A. Giving an example of the type of funding that
25 the -- concerned as to the state match to the federal

1 matching dollars.

2 Q. Then it says Section 1902(a)(30), and we've
3 been using the reverse here, (30)(A), requires payments
4 for services to be consistent with efficiency, economy,
5 and quality of care. And you understand that to be the
6 obligation of the state in reimbursing providers, don't
7 you?

8 A. Yes, I do.

9 Q. Okay. The state plan must include a detailed
10 description of the calculation of upper payment limits;
11 isn't that correct?

12 A. Yes, it is.

13 Q. And finally, Section 1902(a)(2) of SSA --
14 which is the Social Security Act; is that correct?

15 A. Yes, it is.

16 Q. Which authorizes the Medicaid program,
17 provides that the lack of adequate funds from state and
18 local resources will not result in lowering the amount,
19 duration, scope or quality of care, and service
20 available. And you understand that to be the obligation
21 of the state, don't you?

22 A. Yes, I do.

23 Q. The next page, page 14, captioned, "Medicaid
24 Rate Reductions." And it says that state plan
25 amendments for rate reductions. Is a state plan

1 amendment required for a rate reduction?

2 A. No, it is not.

3 Q. When is a state plan amendment required?

4 A. When you are changing the methodology that you
5 are utilizing to make a payment, if you are changing
6 criteria or standards for a provider type, if you are
7 adding or eliminating a benefit. Those are examples.

8 Q. If you're changing the methodology that the
9 state is using to pay providers, that requires a state
10 plan amendment, doesn't it?

11 A. The methodology, yes.

12 Q. While we're on the subject of plan amendments,
13 I'd like to show you what's been marked as Plaintiffs'
14 3. I believe it's a full exhibit. And I'd like to ask
15 you to take a look at the second page of that exhibit.
16 Do you recognize that document?

17 A. Yes, I do.

18 Q. And is that part of the New Hampshire state
19 plan?

20 A. Yes, it is.

21 Q. Let's just orient ourselves on what the state
22 plan is and what it looks like, if you will. Let's go
23 to the bottom of the document and start on the left-hand
24 side, and it says TN Number. T N, N O, period. Do you
25 see that?

1 A. Yes, I do.

2 Q. And that stands for transmittal number; is
3 that correct?

4 A. That's correct.

5 Q. And that transmittal number is the number
6 assigned by the state when it submits a state plan
7 amendment to CMS; is that correct?

8 A. That's correct.

9 Q. Okay. And below that it says: Supersedes TN
10 number, in this instance, 90-11. So that this document
11 supersedes a prior version of this part of the state
12 plan; is that correct?

13 A. That is correct.

14 Q. And then back to the transmittal numbers, that
15 first digit I assume represents the year in which the
16 transmission is made?

17 A. Yes, it is.

18 Q. In other words, in this case 1991, and then
19 the number's assigned, the number of the transmission in
20 that year; is that correct?

21 A. Yes, it is.

22 Q. Okay. Then moving in the middle there is an
23 approval date, and in this instance it looks like it's
24 November 27th, 1992; is that right?

25 A. That's what it says, yes.

1 Q. Okay. And the approval date means the date on
2 which CMS approved the state plan amendment; is that
3 correct?

4 A. That's correct.

5 Q. All right. And then on the right-hand side is
6 the effective date, and in this instance it's
7 November 1st, '91; correct?

8 A. That is correct.

9 Q. And the effective date is something that the
10 state asks for when it submits a state plan amendment;
11 correct?

12 A. That is correct.

13 Q. Now, let's go to the substance of this
14 particular plan amendment. And it says that the plan
15 will be amended whenever necessary to reflect new or
16 revised federal statutes or regulations or material
17 change in state law, organization, policy, or state
18 agency operation; is that correct?

19 A. That is correct.

20 Q. And that is the state's obligation in terms of
21 when it needs to amend the state plan; correct?

22 A. This is the page that speaks specifically to
23 plan amendments. I can't speak to whether there aren't
24 other parts of the state plan that also have information
25 regarding plan amendments.

1 Q. Okay. But you'd agree with me, wouldn't you,
2 that whenever there's a material change in state law,
3 the state needs to submit -- affecting the Medicaid
4 program, the state needs to submit a state plan
5 amendment; isn't that correct?

6 A. For a material change in state law, yes.

7 Q. Okay. Back to page 14 of your April
8 testimony. Public process requirements. There is a
9 requirement under the state plan that there be a public
10 process associated with rate changes; isn't that
11 correct?

12 A. No, that is not correct.

13 Q. Okay.

14 A. If the state plan amendment is submitted,
15 there is a public process. The rate change does not
16 necessarily mean that you will be submitting -- the
17 state will be submitting a state plan amendment.

18 Q. Is there a public -- requirement for a public
19 process associated with rate changes?

20 A. Yes.

21 THE COURT: He doesn't mean a plan amendment,
22 he means a public process.

23 A. Yes, there is.

24 Q. Okay. Let's take a look at Plaintiffs' No. 7,
25 which actually was an exhibit to your affidavit. I

1 believe it's a full exhibit. Ms. Dunn, do you recognize
2 this document?

3 A. Yes, I do.

4 Q. It's a letter from Sally K. Richardson, the
5 director of CMS, and it's dated December 10th, 1997, and
6 it appears that it was issued immediately after the
7 repeal of the Borring (ph.) amendment, and when the
8 requirements of what's known as Section (13)(A) of the
9 Medicaid Act came into effect. Would you agree with
10 that?

11 A. Yes, I would.

12 Q. Okay. Let's take a look at the second
13 paragraph of this letter from Ms. Richardson, and it
14 describes what is required under Section (13)(A).
15 States must use a public process for determining rates.
16 States must publish the proposed and final rates, the
17 methodologies underlying the rates, the justification
18 for the rate. It must give interested parties a
19 reasonable opportunity to review and comment on the
20 rates, methodologies and justifications, and the rates
21 must take into account the situation of disproportionate
22 share hospitals. Do you understand that to be the
23 obligation of the state with respect to Section (13)(A)?

24 A. I understand that that is the obligation as
25 outlined in this letter.

1 Q. Okay. Let's take a look at the next
2 paragraph, please. And I want to pick up on the second
3 sentence of that letter. It says HCFA -- and HCFA I
4 think we can agree is the predecessor agency to CMS; is
5 that right?

6 A. Yes.

7 Q. Okay. HCFA would consider the state to be in
8 compliance with this provision if it elected to use a
9 general administrative process similar to the federal
10 Administrative Procedure Act that satisfies the
11 requirements for public process in developing and
12 inviting comments.

13 Now, Ms. Dunn, I hope we can agree that by
14 statute New Hampshire, or the legislature by statute,
15 has exempted Medicaid rates from the state
16 Administrative Procedure Act; isn't that correct?

17 A. Could you please restate that?

18 Q. Sure. There is a statute which -- let me ask
19 you this way.

20 THE COURT: Well, it's a question of law and I
21 understand that to be the case.

22 MR. MacDONALD: Okay.

23 Q. Is rate making subject to the state
24 Administrative Procedure Act?

25 A. I'm sorry, I'm not able to answer that

1 question.

2 THE COURT: It's no.

3 MR. MacDONALD: Thank you, your Honor.

4 Q. So in the instance that it is not, the letter
5 goes on to say that if -- this is the last line in the
6 third paragraph. If a state public process is not
7 currently being applied to rate setting or does not
8 currently include a comment period, then the rate -- the
9 state would need to modify the process. Do you see
10 that?

11 A. Yes, I see it.

12 Q. And then it turns you to enclosure two for
13 public process options, which are the options endorsed
14 by CMS. And enclosure two appears on the bottom of page
15 2 of this exhibit. Are you with me?

16 A. Yes, I am.

17 Q. Okay. Let's just go through it. States that
18 do not use their existing administrative procedures to
19 satisfy the public process requirement may use at their
20 option one of the public processes established in the
21 Federal Register. It goes on, this allows the states
22 flexibility to design public process based on examples
23 of what we find acceptable. Options which HCFA
24 considers acceptable and which states may elect to
25 choose include four options.

1 Now, my question to you is on option one, does
2 the Department of Health and Human Services of the State
3 of New Hampshire hold one or more public hearings at
4 which proposed rates, methodologies, and justifications
5 are described and made available to the public and time
6 is provided during which comments can be received? Does
7 it hold one or more additional public hearings in which
8 final rates, methodologies, and justifications are
9 described and made available to the public? My question
10 is whether the department has a procedure similar to
11 option one, and I believe the answer is no; isn't that
12 right?

13 A. The answer is yes relative to submitting state
14 plan amendments. In terms of rates, we need to go
15 through each individual rate so that I could respond
16 appropriately.

17 Q. So your testimony is that there's a public
18 process whereby a state plan amendment is proposed and
19 the Department of Health and Human Services holds a
20 hearing?

21 A. For state plan amendments, it depends on the
22 particular state plan amendment. Our state plan does
23 not specify what that public process is. In fact, CMS
24 has reinforced recently that they have allowed the
25 states to have flexibility in determining that. In the

1 past --

2 THE COURT: Just so I don't get confused, and
3 we have a finite amount of time in our lives, I think
4 what he's driving at is with respect to the rate
5 reductions, was there some process that was followed
6 that you're aware of? Some public process, any public
7 process --

8 THE WITNESS: Yes, your Honor.

9 THE COURT: Can you tell me what it was?

10 THE WITNESS: Yes, your Honor.

11 THE COURT: What is it? What was it?

12 THE WITNESS: Again, going through each of
13 the --

14 THE COURT: Take one and just give me an
15 example. What was the rate reduction, what was the
16 process. Do you mind? I know you mind, but I want to
17 cut through it.

18 THE WITNESS: So you take, for instance, the
19 November 2008 patient reduction, that was actually a
20 rate reduction that had been started -- have
21 conversations about back in the beginning of 2008.
22 There was an exchange of information and letters between
23 the department and the New Hampshire Hospital
24 Association. The Hospital Association had suggested
25 alternative methods to achieving the savings. That item

1 -- so that happened in February.

2 In April we brought forward a fiscal committee
3 item to the Joint Legislative Fiscal Committee. That
4 hearing took place, at which time the item was tabled by
5 the legislators because they wanted the department to go
6 back and try to work with the hospitals, again, to come
7 up with a plan to not have to do the outpatient hospital
8 rate reductions. There were subsequent conversations
9 between Commissioner Toumpas, the governor, and
10 representatives from the Hospital Association.

11 When the -- at that point -- as we got into
12 the late summer it became clear that there wasn't going
13 to be a resolution. So we put forward a fiscal item
14 that was heard on November 21st. Prior to that item
15 going forward, we had communicated with the Hospital
16 Association, who historically has always represented the
17 individual hospitals, to confirm what the reduction was
18 going to encompass and how much it was going to be,
19 given that the item had been delayed from April to
20 November.

21 We then held -- the fiscal meeting was held.
22 There was a lot of conversation about -- questions
23 around rate setting and access. The item was approved.

24 Following that we published what they call
25 remittance advices. It's on the -- like the check that

1 goes to the hospital. It's the remittance, and there's
2 almost like an explanation of benefits on the top of it.
3 We also sent -- I also signed individual letters to
4 every hospital notifying them of what their rate --
5 their new rate was going to be under that reduction.

6 THE COURT: I'm sorry. Thank you.

7 Q. MR. MacDONALD: What is the process?

8 A. Pardon me?

9 Q. What is the department's process?

10 A. For what, sir?

11 Q. For rates. You have an obligation under
12 Section (13)(A) to have a public process. Where is the
13 process that you have in place published?

14 A. The rate changes generally are or have been
15 associated with a legislative change.

16 Q. I'm sorry. I'm asking about the existence of
17 a public process. And it is a fact, isn't it, that
18 there is no written public process which the department
19 has which purports to comply with Section (13)(A); isn't
20 that correct?

21 A. No, I don't agree with you.

22 Q. What is the -- where --

23 A. There is no requirement for us within our
24 Medicaid state plan to specify what the public process
25 will be.

1 Q. Okay. Does the department use a commission or
2 similar process in determining rates where meetings are
3 open to the public and final rates, methodologies, and
4 justifications are made available? That's option two
5 from the CMS.

6 A. We have used that and we've used it recently.

7 Q. You haven't used it in any of the rates at
8 issue in this case; isn't that correct?

9 A. I'm sorry. I don't agree with you, sir. We
10 had a group, a commission, it wasn't an official
11 commission, but it was a group that had legislators and
12 hospitals for the 2010 DSH program redesign.

13 Q. Do you include a notice of intent to submit a
14 state plan amendment in newspapers of general
15 circulation and provide a mechanism for members of the
16 public to receive a copy of the proposed and final
17 rates, methodologies, and justifications underlying the
18 amendment and an opportunity which shall not be less
19 than 30 days prior to the effective date to comment on
20 the proposed rates, methodologies, and justifications?

21 A. If we are submitting a state plan amendment,
22 we do follow this.

23 Q. You allow a comment period of no less than
24 30 days prior to the effective rate. That is your
25 testimony?

1 A. To the proposed effective date.

2 Q. Okay. Now, the long answer you gave to the
3 Court related to a budget -- a rate cut which took place
4 in November of 2008; isn't that right?

5 A. It was approved in November of 2008.

6 Q. Okay. And that cut that you described, or the
7 process if you will that you described, related to a cut
8 of outpatient rates from 81.24 percent to 54.04 percent
9 of allowable costs for non-critical access hospitals;
10 isn't that correct?

11 A. That is correct.

12 Q. And the rate cut was submitted to the Joint
13 Fiscal Committee on or about October 30, 2008; isn't
14 that right?

15 A. The item was -- submitted back in April of
16 2008 was tabled.

17 Q. The item to cut to 54.04 percent?

18 A. No, sir. It was the item to reduce the rate,
19 which at that time would have only had to have been
20 reduced to I believe 62 percent.

21 Q. Okay. So the April rate was only to
22 62 percent, and the October rate cut which was
23 eventually approved was to 54.04 percent; isn't that
24 right?

25 A. That is correct.

1 Q. And those are two different rate cuts; isn't
2 that correct?

3 A. They are the same rate cut that had to be
4 adjusted because of the delay between July 1 until the
5 November fiscal item was approved.

6 Q. The first rate cut was never approved; isn't
7 that correct?

8 A. It was tabled.

9 Q. I'd like to show you Exhibit 16. Exhibit 16
10 appears to be a letter dated October 30, 2008, to
11 Representative Smith, who I think we can agree was the
12 chairman of the Joint Fiscal Committee at that time; is
13 that correct?

14 A. That's correct.

15 Q. And it appears that you -- your name is at the
16 end of the letter. I'm not sure you signed it. But did
17 you review and approve of this letter?

18 A. Yes, I did.

19 Q. Okay. And on page 1 of the letter it recites
20 RSA 126-A:3 VII, and it was pursuant to that statute
21 that you were presenting this rate cut; isn't that
22 correct?

23 A. That is correct.

24 Q. Then page 2, first paragraph of text, second
25 sentence, you are telling the committee that the cut is

1 required to bring expected expenditures in line with the
2 appropriations for SFY 2009. The department proposes to
3 reduce payments for hospital outpatient services by
4 33.48 percent, from the current 81.24 for Medicare
5 allowable costs to 54.04 percent of Medicare allowable
6 costs for non-critical access hospitals effective
7 retroactive to July 1st, 2008.

8 And the committee took up this proposal, and
9 I'd like to show you the testimony. This rate cut was
10 to bring the amount that the department was going to
11 spend on outpatient rates in line with the amount that
12 had been appropriated; isn't that correct?

13 A. It was done to bring in line what we had
14 projected for a total expenditure for that year.

15 Q. It was to meet the requirements of your
16 budget; isn't that correct?

17 A. Yes, and to meet the state law.

18 Q. Exhibit --

19 THE COURT: The rate was set to basically work
20 out to equal the amount of money available to you.

21 THE WITNESS: That's correct, your Honor.

22 Q. Exhibit 23 is the transcript of the hearing.
23 And you appeared and testified; is that correct?

24 A. I believe, yes, I did, with Commissioner
25 Toumpas.

1 Q. And page 38, this is exactly the point the
2 Court just made. You had a colloquy with Senator Kelly
3 and -- bottom third of the page, Senator Kelly: You
4 made a decision on that particular amount, that
5 percentage, so that you would balance the budget on that
6 line item. And then you answered: That is correct.
7 And that's what happened; isn't that right?

8 A. That is what I answered, yes.

9 Q. And you yourself --

10 THE COURT: But is that in your view what
11 happened as well? I know it's what you answered, but
12 the question is, is that really what happened?

13 THE WITNESS: Yes, with the understanding that
14 when balancing the budget, it wasn't for the entire
15 budget, sir. It was specific to outpatient hospital
16 line in the budget that has its own separate line. I
17 didn't want to confuse --

18 THE COURT: For Medicaid outpatient care?

19 THE WITNESS: Yes.

20 THE COURT: Okay.

21 Q. Now, you viewed these cuts as drastic, didn't
22 you?

23 A. I believe that that's what my testimony speaks
24 to.

25 Q. You told the Joint Fiscal Committee that they

1 were drastic, and these cuts did not comply with the
2 state's obligation under Section (30)(A), did they?

3 A. I'm not sure I used the word drastic, first of
4 all. And in terms of complying with (30)(A), we
5 followed the exact same procedure that we had followed
6 -- or the state followed in 2005 when there was a
7 previous rate reduction to hospital outpatient services.
8 There was no state plan amendment filed. The rate
9 reduction went through the exact same process that this
10 one did. I was not there, so -- I was not the Medicaid
11 director, so I can't speak to who testified about the
12 impact of it.

13 And so my point is, sir, I'm trying to say we
14 followed the exact same process we followed in '05 and
15 did not receive to my knowledge any feedback, concern
16 voiced, letters, emails, phone calls that I'm aware of
17 from individual hospitals or the Hospital Association
18 saying that they didn't agree with how the 2005 cut was
19 implemented. Consistent with that, we followed the same
20 procedure in '08.

21 Q. Let's just -- so we're all on the same page
22 and we understand what's going on, the statute at issue,
23 1206-A:3 VII was enacted in 2005. Can we agree to that?

24 A. I would have to -- if it's a fact I'll agree
25 to it, but I don't have that in front of me.

1 Q. But in 2005 there was a prior across-the-board
2 rate reduction effected under that statute which brought
3 the Medicaid outpatient rates for non-critical access
4 hospitals from 91.27 percent down to 81 percent; isn't
5 that right?

6 A. Down to 84 and, sir, it does say in here
7 July 1, 2005.

8 Q. Okay. Now, let's go back to the 2008 rate
9 reductions. These were effected because -- effected
10 under this statute, as we've already established, and
11 the state did not go through any process to determine
12 how the revised, reduced rates will comply with its
13 obligations under Section (30)(A); isn't that correct?

14 A. I'm sorry, sir, could you restate that?

15 Q. Sure. Prior to the rate reductions approved
16 by the Joint Fiscal Committee on November 21st, 2008,
17 effective retroactive to July 1st, 2008, the state
18 didn't do any analysis about how that rate reduction
19 would impact its obligation under Section (30)(A) in
20 terms of providing for consistent -- I'm sorry,
21 efficiency, economy, and quality of care, and access to
22 care; isn't that correct?

23 A. There was no specific study completed that I'm
24 aware of.

25 Q. Okay. And just on the point of your

1 characterization of the rates, I just turn you on
2 page 23 -- Exhibit 23, I'm sorry, page 48. You had a
3 colloquy with Representative Kirk and you were answering
4 his question, and it's your first answer on that page.
5 I believe that is what should happen because of the
6 sensitivity around the fact that we are drastically
7 reducing outpatient hospital rates. Isn't that what you
8 told Representative Kirk?

9 A. Yes. Thank you for refreshing my memory.

10 Q. You're welcome. The commissioner also
11 appeared and testified with you, and I'd like to direct
12 your attention to page 54 of the testimony. And it's a
13 colloquy that Commissioner Toumpas had with
14 Representative Kirk. Representative Kirk -- I'm not
15 going to read the whole thing, but at the end of his
16 statement he asks -- he says, quote, but there is
17 another way. The hospitals could absorb this out of
18 their surplus. So the question I'm asking is, do we
19 know if the hospitals have sufficient surplus to absorb
20 this kind of cut, or will they in fact have to cost
21 shift it just to maintain, at least for the nonprofit
22 corporations, at least to break-even financial position?
23 And the commissioner answered that you did not have
24 access to the data on hospital finances; isn't that
25 correct?

1 A. He states that we did not have the projections
2 on a hospital by hospital basis in terms of what it
3 would mean to their operating margin in the past year.
4 That's correct, we do not have access to that
5 information.

6 Q. And you didn't consider it, therefore, in
7 recommending this across-the-board 33 percent cut; isn't
8 that right?

9 A. No, we considered the information that we were
10 able to understand from an October 2008 report that was
11 presented publicly that was commissioned by the
12 Endowment for Health and looked at the financial health
13 of the hospital network in New Hampshire, individual
14 hospitals as well, by Dr. Nancy Kane.

15 Q. You were obligated under the statute to make
16 an across-the-board cut, isn't that correct, regardless
17 of whatever the Kane report said?

18 A. We were obligated to bring the item forward
19 for rate reduction, yes, sir.

20 Q. Okay. Now, there was no public notice of the
21 state's reduction of rates down to 54.04 percent 30 days
22 prior to their effective date which was July 1st, 2008,
23 was there?

24 A. That would depend on how you define public
25 notice, sir, and I'm not trying to be flip. There have

1 been conversations going on from the beginning of
2 January 2008 with the Hospital Association about what
3 the issue was, what the numbers look like, and there was
4 exchanges of letters both back and forth between the
5 department, and also the Hospital Association, with the
6 Governor's Office as well.

7 Q. I'm asking about the rate reduction to
8 54.04 percent. There was no public notice that the
9 state was going to reduce the outpatient rates to that
10 level 30 days prior to July 1st, 2008, was there?

11 A. The hospitals knew about this back at the
12 beginning of the year. You're asking if we held a
13 specific public hearing. No, we go through the Joint
14 Legislative Fiscal Committee hearing process and that's
15 what we did, sir.

16 Q. And let me -- you didn't know until October,
17 thereabouts, that you'd need to cut the rates down to
18 54.04 percent; isn't that right?

19 A. No, we knew that there was going to be a
20 deficit. Right after the beginning of every calendar
21 year, so January, we project out all of our costs
22 through the end of the fiscal year, which goes through
23 June 30th. In January it was already apparent that
24 there was going to be a deficit in that particular line
25 item, plus others that have nothing to do with the

1 hospitals. At that point there started the exchange of
2 ideas for how to close that gap between the department,
3 the governor, and the Hospital Association.

4 Q. Well, I'm going to ask this one more time.
5 The specific rate cut that the joint legislative
6 committee approved on November 21, 2008, was not subject
7 of a public notice 30 days prior to its effective date;
8 isn't that correct?

9 A. Based on how you've asked the question, the
10 answer is yes.

11 Q. Now, I'd like you to again on the testimony
12 flip back to page 47. Okay. Middle of the page as it's
13 on the screen, again another colloquy with
14 Representative Kirk. He says: Follow-up of an
15 additional question. The statutory requirement in the
16 budget if there isn't enough money to pay the bill, you
17 cut back on the rate. It's what's another version of
18 what we call budget neutrality. Is that something that
19 requires modification to the state plan, and if so, has
20 that been obtained? To which you respond: It does not
21 require state plan amendment.

22 Now, that was not a correct answer, was it?

23 A. I don't agree with that, what you just said.
24 It was a correct answer. It did not require a state
25 plan amendment. In subsequent conversations, both

1 letters exchanged between the Hospital Association and
2 CMS and our follow-up with CMS, there was no request to
3 file a state plan amendment by our federal officials.

4 Q. I'm going to show you Exhibit 2. Now,
5 Exhibit 2 was submitted in this case as part of an
6 affidavit by one of your colleagues, Diane Peterson.
7 And it is, as I understand it, a compendium of state
8 plan amendment pages relating to outpatient services.
9 Would you agree with that?

10 A. That's what it looks to be, yes, sir.

11 Q. Okay. Could you please turn to the page, the
12 approved state -- the approved page pending -- strike
13 that. To the page governing outpatient reimbursement
14 which had been approved by CMS as of November 21st,
15 2008, and just tell me what page you land on.

16 A. For the outpatient rate reduction?

17 Q. Yes.

18 A. We didn't submit a state plan amendment for
19 that rate reduction.

20 Q. What was the methodology in effect at the time
21 the 2008 outpatient rate reductions were in effect?

22 A. The methodology for what, sir?

23 Q. Setting outpatient rates.

24 A. For setting outpatient rates? The rates were
25 set based upon -- I'm not sure if you're asking me to

1 talk about how cost rates reimbursement and how all that
2 happens.

3 Q. No. I'm asking you, as the state Medicaid
4 director, to point to me in the state plan where the
5 methodology exists as of November 21st, 2008, in terms
6 of setting outpatient reimbursement rates.

7 A. The last approved page that I see in this
8 packet --

9 THE COURT: No, he's saying if I wanted to
10 look at this and say what method do you use to set
11 outpatient reimbursement rates, what method would I
12 find? What does it say? How do you go about doing
13 that?

14 MR. MacDONALD: May I, your Honor. Had CMS
15 approved at the time they made these rate reductions --

16 THE WITNESS: The rates were set based upon
17 the funding that was available --

18 THE COURT: This isn't my field and I'm easily
19 confused.

20 THE WITNESS: Yeah. I am, too.

21 THE COURT: So what he's really asking, what
22 I'd be interested in, too, is show us where the approved
23 methodology is in that plan for setting the rates as of
24 November 21, 2008. What is it, where is it, how do I
25 see that? I ask myself, gee, what's the methodology for

1 setting outpatient Medicaid reimbursement rate within
2 the state plan as of November 21, 2008. What do I read
3 that's going to tell me what that methodology is?

4 THE WITNESS: Looking at the last page that
5 was approved, sir, I don't see it specifically spelled
6 out.

7 THE COURT: There is no methodology in the
8 state plan?

9 THE WITNESS: It talks about the interim
10 payments that we make to the hospitals and how we do
11 retrospective cost based reimbursement based upon --

12 THE COURT: But I'm a provider and I want to
13 know how you're going to set the rate. And you agree
14 you have to put in the plan the methodology for setting
15 the rate, right, so I know what it is?

16 THE WITNESS: Yes, you're right.

17 THE COURT: I wouldn't find it in the state
18 plan?

19 THE WITNESS: You wouldn't find it on the last
20 approved state plan page that CMS approved.

21 THE COURT: I have no idea what that means.

22 THE WITNESS: It means that the last time CMS
23 looked at this page and approved it, it was not
24 contained within this particular page. It means that
25 there is a subsequent state plan amendment where further

1 clarification can and is made relative to methodology.

2 MR. MACDONALD: May I, your Honor?

3 THE COURT: Please.

4 Q. BY MR. MACDONALD: Let's just take this one
5 step at a time, and it is confusing. Could you identify
6 for the Court the page that CMS had approved governing
7 outpatient reimbursement methodology as of
8 November 21st, 2008.

9 A. It would be what is labeled at the top as page
10 6 of 57 of Plaintiffs' Exhibit 2. I believe at the
11 bottom it says that the last transmittal number that was
12 approved was 87-7 and that there was a pending state
13 plan amendment that had been submitted. So 87-7, that
14 means it was 1987.

15 Q. I'm looking for the page that says approved,
16 not one that's pending.

17 A. Then you have to turn to the page before then.

18 Q. Okay. And let's take a look at that page.
19 And just so we're all on the same page so to speak,
20 let's go down to the bottom of the page and again
21 starting on the left, it's transmission number 87-7; is
22 that correct?

23 A. Yes, sir.

24 Q. And that had been approved on November 5th,
25 1987?

1 A. That's correct.

2 Q. And it had an effective date of July 1st,
3 1987?

4 A. That's what it says, yes.

5 Q. Okay. Now, let's go to the paragraph marked
6 outpatient hospital services. And for the Court's
7 benefit, would you agree that that was the approved
8 methodology in place at the time of the 33 percent rate
9 reduction?

10 A. Yes, it seems to be the approved page.

11 Q. And you would agree with me that that
12 methodology does not support an across-the-board
13 33 percent rate reduction; isn't that right?

14 A. Well, sir, it says -- I don't want to read
15 what it says here, but it reads to me that payment will
16 be made at the lowest charge determined, and it goes on
17 and then it ends with the lowest charge level determined
18 by the Title 19 state agency, which is the Department of
19 Health and Human Services. That's how it was
20 interpreted.

21 Q. Let's start at the beginning. Payment is made
22 in accordance with the methods and principles developed
23 for reimbursement in such services for hospitals
24 participating in Title 18 of the Social Security Act.
25 And that refers to Medicare, doesn't it?

1 A. It does.

2 Q. And how are Medicare hospitals compensated?

3 A. I can't answer that, sir, I'm sorry.

4 Q. On certain medical services and supplies
5 designated by the secretary of Health and Human Services
6 -- we don't have secretaries in New Hampshire, do we?

7 A. No, we do not.

8 Q. Payment will be made at the lowest cost charge
9 level determined by the Title 18 agency for Medicare
10 covered services, and for Medicaid covered services the
11 lowest charge level determined by the Title 19 state
12 agency.

13 That language does not support a reimbursement
14 methodology where the director of the state Medicaid
15 program can come into the Joint Legislative Fiscal
16 Committee and recommend an across-the-board budget cut,
17 does it?

18 A. Sir, you're asking me to compare this legal
19 language -- the state plan language along with the state
20 law, and I don't feel that I'm prepared to do that.

21 Q. Okay. But there's another complication to
22 this --

23 MR. MacDONALD: And I'm sorry, your Honor, but
24 -- it's a bit complicated, but it's actually important.

25 THE COURT: Can you do it in five minutes?

1 MR. MacDONALD: I'll try.

2 THE COURT: Well, we have our own budget
3 problems in the federal government and we have committed
4 to the United States Marshal that we would not carry
5 proceedings up to or beyond 5 o'clock because then he
6 has to pay overtime to the court security officers and
7 he runs afoul of his own budget restraints, so we're
8 kind of limited. Do you want to do it tomorrow?

9 MR. MACDONALD: Take a break.

10 THE COURT: All right. Why don't we adjourn
11 till tomorrow morning. Is the schedule for 9:30?
12 9 o'clock all right?

13 MR. O'CONNELL: Yes, your Honor.

14 THE COURT: Why don't we do 9 o'clock. Thank
15 you.

16 (Adjourned at 4:45 p.m.)
